

## **Item: GroPro**

Written by Kitteh6660

GroPro works essentially the opposite of ReductPro. It works just like the GroPlus of CoC except that you can target one cock or all cocks. You can also target one row or all rows of breasts.

### **Item Info**

**Important info:** Diminishing returns apply to GroPro: The bigger your endowments, the harder it is to grow them further. You would eventually reach a point where it takes 10 of GroPro to grow your cock by just 1 inch. The diminishing returns are actually a safeguard to keep endowments from immobilizing you. Cannot be used to grow balls past 39 inches due to "primal instincts".

**Location:** Possibly sold from Gene and Sera. Or crafted with 1x Throbb and 1x ?????? if crafting were in the game. Also sold by Professor Azul, price is proportional to his affection.

**Short Name:** GroPro

**Long Name:** A package with a single container labeled "GroPro".

**Description:** This is a colorfully-packaged box featuring some holovid sales girl.

{**If silly:** "<i>Hi, Milly Bayes here with new GroPro! Tired of having a dick that's too small? Sick of your breasts not being big enough? Well, now J'ejune Pharmaceutical has the solution for your problems thanks to our collaboration with Professor Azul, one of the greatest scientists in most pharmacy circles! GroPro uses powerful, fast-acting agents based on amazing scientific research to provide a boost you can rely on! Just inject GroPro in the target area, and in seconds you'll see immediate results with no long-term side effects! Don't put up with your petiteness, get the bigger sizes you need with GroPro!</i>"}{**Else:** White lettering informs you that this syringe is designed to help you enlarge body parts without deleterious effects.}

Below this, in much smaller text, is a long string of minor potential side effects. Within the colorful packaging is a syringe filled with blue liquid.

**Cost:** 2000 credits

## Usage

You open the colorfully-packaged box{**If first time:** ,}{**Else:** and} pull the syringe out of the box{**If first time:** and decide to scan the item. The codex pulls up a research abstract that reveals the drug is completely safe to use, although it's quite potent, capable of affecting even the Simii. As the article on it ends, your codex beeps and informs you this drug was invented by a rat-eared doctor known as Professor Azul. He is reputed to be the galaxy's greatest alchemist in most pharmacy circles.}{**Else:** .}

You ponder over how to use GroPro. Which body part will you shrink?

//Can only grow body parts if you have them. Cannot be used to grow past the limit.
