Body-

Hey [First Name],

OfferMint AI just launched — and this is the one tool I genuinely couldn't wait to send you.

Here's why:

Every AI writing tool you've ever used does one thing — writes content. Then it steps back. Your idea sits there, half-finished, waiting for you to figure out the product, the offer and the marketing yourself.

OfferMint AI does something different.

Wanna know how it's different?

[WATCH OFFERMINT AI IN ACTION HERE →]

It's the World's First MintCore™-Powered Idea-To-Offer AI — turning any basic idea into a complete product, a full offer, and a ready marketing campaign, so you can sell on Amazon KDP, Etsy & Gumroad.

But here's where it gets insane...

- 👉 It doesn't stop at content
- 👉 It builds the product structure, the pricing, the bonuses and the guarantee
- 👉 It writes the sales copy and prepares your marketplace listings — all from one idea

So your idea doesn't just sit in a notes app...

It becomes a complete, sellable offer — usually in minutes.

No Design Skills · No Copywriting · No Tech Experience
No Monthly Fees · No Waiting · No Experience Needed

[GRAB OFFERMINT AI AT THE \$17 LAUNCH PRICE →]

Commercial licence is included. One payment, yours forever.

This launched today and the price is only going up from here — early-bird is \$17 versus the regular \$47/month.

Don't sit on this one.

[YOUR NAME]

P.S. The reason I'm excited about this isn't the tech — it's simple.

An AI that takes your idea all the way to a finished, priced, marketed product is something most creators have never had access to. And your audience knows it when they see it.

Body-

Hey [First Name],

Most "make money online" angles require you to keep doing something.

Not this one — see why here: **[YOUR AFFILIATE LINK]**

Write more content. Design more graphics. Rewrite the sales page. Piece together five different tools. Start over on the next idea.

OfferMint AI is different for one specific reason.

You give it one idea — in plain text. The MintCore™ engine builds the complete product, the full offer stack (positioning, pricing, bonuses, guarantee) and the entire marketing campaign around it. Then it formats the whole thing for Amazon KDP, Etsy and Gumroad — three marketplaces from one idea.

You describe the idea. OfferMint AI builds the rest — usually in minutes. Then you list it, and it keeps selling.

While you're working on the next idea. While you're sleeping. While you're doing anything else entirely.

And with the commercial licence included — you can build products, offers and marketing kits for clients and charge whatever you like. Nobody else in your market can hand a client a finished product, offer and marketing campaign built from a single idea.

[YOUR AFFILIATE LINK]

One-time payment of \$17. No monthly fees. No credits. No limits.

Build the idea once. Let it sell everywhere. That's the entire model.

[YOUR NAME]

P.S. OfferMint AI is live at the one-time launch price right now. Once that window closes — it moves to a monthly subscription. The link above locks in the \$17 deal.

3. Curiosity Boosting Angle

Subjects-

- **What does an idea look like 3 minutes after you type it in?**
- **This planner didn't exist 3 minutes ago. Now it's making \$115/day.**

- 11 sales in 9 months. 47 sales in 30 days. Same product. What changed?
- What if your next idea already knew how to sell itself?
- The AI tool nobody expected — and nobody can explain away
- Something happened when this idea got run through OfferMint AI...
- Why's Everyone Curious About OfferMint AI — Find Out Yourself
- Marketers Are Losing Their Sleep — How's OfferMint AI Doing It

Body-

Hey [First Name],

I've never seen anything quite like this before.

See what I mean here: **[YOUR AFFILIATE LINK]**

Let me paint you a picture.

Priya had a 60-page planner bundle sitting on Etsy for 9 months. Flat \$12 price. No bonuses, no add-on, no guarantee. 11 sales total.

She didn't touch the planner itself. She ran it through OfferMint AI.

Within minutes — same product, same files — she had a rewritten listing, a new headline, 3 bonus files, and a simple add-on offer, all generated for her.

30 days later: conversion went from 0.9% to 2.6%. Average order value went from \$12 to \$19.40. The listing pulled in \$911 — nearly 7x what it had earned in the entire previous year.

She didn't change one page of the planner. She changed everything wrapped around it.

That's what happens when an idea gets run through a MintCore™-powered engine that doesn't just write content — it builds the product, the offer AND the marketing, all from one input.

Type an idea in. Watch it come out the other side as a complete product, a priced offer stack, and ready-to-publish marketing copy — for Amazon KDP, Etsy, or Gumroad.

Most people's ideas die in a notes app. This one didn't.

[YOUR AFFILIATE LINK]

One-time payment. Commercial licence. 30-day guarantee.

[YOUR NAME]

P.S. It goes from idea to finished product, offer and marketing set in roughly 3 minutes.
See it happen at the link above.

Hey [First Name],

If you do any kind of freelance, agency, or client work — pay attention to this.

See it here before anyone else does: **[YOUR AFFILIATE LINK]**

Something launched today that changes what's possible for anyone who creates digital products, offers, or marketing for a living.

It's called OfferMint AI. And in 60 seconds I'll explain exactly why it matters for your business.

Right now — every freelance writer, coach, and marketer is delivering the same thing to clients: content. An ebook. A lead magnet. A sales page. One piece at a time, billed separately, built from scratch every time.

OfferMint AI changes that entirely.

Give it a client's idea — a book concept, a planner, a lead magnet, a course outline — and the MintCore™ engine builds the complete product, the full offer stack (positioning, pricing, bonuses, guarantee) and the marketing campaign to go with it. Formatted for Amazon KDP, Etsy, Gumroad, or wherever the client wants to sell it.

Not a paragraph. Not a headline. An entire, sellable offer.

And here's the business reality:

Not a single freelancer on Fiverr or Upwork can hand a client a finished product, offer and marketing campaign from one conversation. Because they're all building one piece at a time.

You can — the moment you get OfferMint AI today.

Commercial licence is included. Build for unlimited clients. Zero royalties.

Early users are pricing full product-and-offer packages at \$500 to \$5,000. Some are adding monthly retainers for ongoing product development.

[YOUR AFFILIATE LINK]

One-time payment. Yours forever. Idea to finish the offer in minutes.

[YOUR NAME]

P.S. Your competitors are still selling content by the page. You can start selling complete, ready-to-launch offers today. The link above opens OfferMint AI at the launch price — before it moves to monthly.

Hey (Name)

Imagine having a product team that:

- ✓ Never takes a break
- ✓ Never asks "what should I build next?"
- ✓ Never charges you monthly
- ✓ Never leaves you staring at a blank page
- ✓ Builds the product, offer AND marketing for every idea you give it

That's exactly what OfferMint AI does.

👉 **[YOUR AFFILIATE LINK]**

Unlike ordinary AI writing tools...

OfferMint AI actively:

- ✓ Turns your rough idea into a structured digital product
- ✓ Builds the positioning, pricing and offer stack around it
- ✓ Writes the sales copy and marketing campaign
- ✓ Formats everything for Amazon KDP, Etsy & Gumroad

It's like having a product strategist and copywriter built directly into one workflow.

And the craziest part?

You don't need:

- ✗ Design experience
- ✗ Copywriting skills
- ✗ Product-creation experience
- ✗ Expensive monthly tools

Just describe the idea...

and OfferMint AI builds the complete product, offer and marketing set in minutes.

Body-

Hey [First Name],

I'm going to say something that might sting a little.

But see this first — it's the reason why: **[YOUR AFFILIATE LINK]**

Every AI writing tool you're currently paying for — whether it's \$20 a month or \$50 a month — has the same fundamental flaw.

It writes content. Then it steps back.

What happens after — how the idea gets structured into a real product, how it gets priced and packaged into an offer, how it gets positioned and marketed — none of that is the tool's problem.

That's your problem. And you've been dealing with it silently every time an idea sat unfinished in your notes.

One AI writes your paragraphs. Stops. Another AI designs your cover. Stops. A course teaches you structure. Stops. Every tool you've tried — does one piece. Stops.

OfferMint AI doesn't stop at content.

The MintCore™ engine underneath it takes your idea all the way through: product structure, offer stack, pricing, guarantee, bonuses, sales copy, and marketplace-ready listings for Amazon KDP, Etsy and Gumroad.

It maps the full offer before you ever open a second tool. It builds the bonuses and the guarantee automatically. It writes JV/promo copy so you're not starting from zero with affiliates either.

No other tool on the market takes an idea this far in one workflow. Not one.

[YOUR AFFILIATE LINK]

One-time payment. The workflow you've always needed for turning ideas into products — finally exists.

[YOUR NAME]

P.S. Add up what you're paying monthly across the AI writing tool, the design tool, and the course that taught you to offer structure. Then look at OfferMint AI's \$17 one-time price. The math isn't close.

Body-

Hey [First Name],

Here's a business opportunity that opened up today.

And most people haven't spotted it yet — see it here: **[YOUR AFFILIATE LINK]**

OfferMint AI just launched. It's the first idea-to-offer AI that takes any basic idea and turns it into a complete digital product, a full offer, and a ready marketing campaign — automatically.

That's the product. But here's the business.

The commercial licence is included.

Which means you can build products, offers and marketing kits for clients — and charge whatever you like.

Here's why the pricing opportunity is real:

What you're delivering — a finished product, positioning, pricing, bonuses, a guarantee, sales copy and marketplace-ready listings for Amazon KDP, Etsy or Gumroad, all from one idea — is something no freelance writer or "content AI" user on Fiverr or Upwork can offer.

Not at \$50. Not at \$500. Not at any price.

Because they're all delivering pieces — a paragraph here, a headline there. A partial job at best.

You're delivering a complete, sellable offer. Something the client can list today.

Early users are positioning full product-and-offer packages at \$500 to \$5,000. Some are adding retainers for ongoing product development. There are no royalties. No per-client fees. No restrictions on how many you build or sell.

Build it in minutes from a plain-text idea. Charge for it like it took weeks. Keep every penny.

[YOUR AFFILIATE LINK]

This is the product-creation business nobody in your market is offering yet.

[YOUR NAME]

P.S. The \$17 one-time launch price is still available right now. Once it closes — OfferMint AI moves to a monthly subscription and the economics of this opportunity change significantly. The link locks in the deal as it stands today.

- **The \$200/Month AI Tool Stack Ends Here**

Body-

Let's be honest...

Most AI tools today are nothing more than expensive monthly bills disguised as "productivity software."

What if we gave you one Idea-To-Offer AI that replaces the entire stack?

👉 **[YOUR AFFILIATE LINK]**

You pay every month for separate tools...

Yet your idea still:

- ❌ Sits half-written in a doc
- ❌ Has no offer structure, pricing, or bonuses
- ❌ Has no marketing copy ready to go
- ❌ Isn't formatted for any actual marketplace
- ❌ Doesn't actually SELL

It just sits there.

Meanwhile tools like:

- A \$20–\$40/month AI writing tool
- A \$13–\$30/month design tool
- A \$30–\$50/month copywriting AI
- A course or coach for offer structure

keep charging you month after month...

even though none of them ever finishes the job.

That's exactly why OfferMint AI was created.

👉 **See OfferMint AI Here:**

OfferMint AI is the first MintCore™-powered Idea-To-Offer AI that:

- ✅ Turns your idea into a structured product
- ✅ Builds the full offer — pricing, bonuses, guarantee
- ✅ Writes your sales copy and marketing campaign
- ✅ Formats everything for Amazon KDP, Etsy & Gumroad

And the best part?

NO monthly fees.

You pay \$17 once...
and own the entire workflow forever.

No subscriptions.

No renewals.

No surprise invoices.

Body-

Most people think they have an idea problem.

They don't.

The REAL problem?

Every idea gets treated the same — dumped into a notes app and left to rot.

👉 **[YOUR AFFILIATE LINK]**

Right now...

- Good ideas get typed up and never structured into a real product
- Half-built products never get an offer wrapped around them
- Finished products never get proper marketing copy
- Great concepts disappear into "I'll come back to this later"

That's not product creation.

That's a leaky bucket.

And every idea you let leak out... is a product, an offer, and a sale you never collected.

That's where OfferMint AI changes everything.

- ✓ Formats everything for Amazon KDP, Etsy & Gumroad
- ✓ Turns more of your ideas into finished, sellable products

All while you do far less manual work than before.

No design skills.

No copywriting.

No expensive monthly tools.

Before you write another ebook or buy another content course — read this.

And check this out first: **[YOUR AFFILIATE LINK]**

You don't have an idea problem.

You've got a folder full of them — planners, guides, templates — sitting untouched. And you have no idea which ones were actually worth building. Whether one of them would have made real money with the right offer around it.

More ideas doesn't fix that. It just means more things sitting untouched.

The problem isn't the number of ideas. It's what happens between the idea and the finished offer.

OfferMint AI fixes what happens between the idea and the offer.

The MintCore™ engine takes the idea you already have and builds the product structure, the pricing, the bonuses, the guarantee and the marketing copy — matching what that specific type of product needs to actually sell.

Planners. Guides. Workbooks. Journals. Templates.

All handled. Automatically. With the ideas you already have sitting in your notes.

Same idea. Real offer. More sales. No extra content creation.

[YOUR AFFILIATE LINK]

One-time payment. Commercial licence. Built in minutes.

This is what happens when your idea finally gets the offer it needs.

Body-

Hey [First Name],

By now you've probably heard about OfferMint AI from a few different people.

Here's why smart marketers are moving fast on this: [YOUR AFFILIATE LINK]

Marketers who've seen what it does understand immediately why it's different. Not because of the feature list. Not because of the price. But because of one specific thing OfferMint AI does that nothing else on the market can.

It doesn't stop at content.

Most AI tools write. OfferMint AI builds the entire offer around what it writes — the product structure, the positioning, the pricing, the bonuses, the guarantee, and the marketing campaign — based on the type of product you're creating, not a generic template.

The illustrative math behind this: turning a bare product page (1% conversion, \$270 on 1,000 visitors) into a real offer with a bump and upsell (3.5% conversion, \$1,450 total) roughly 5x's the same traffic — because two-thirds of that difference comes from a bump and upsell that simply don't exist on a bare product page.

This is what professional product launches pay copywriters and strategists thousands to build.

Personalised, well-structured offers consistently outperform bare product pages. That's the entire premise behind order bumps and upsells — money that's already sitting there, uncollected, until something is built to capture it.

OfferMint AI delivers all of this — for every idea you have — for a one-time payment.

No monthly fees. No credit system. No learning curve. Idea to finished offer in minutes.

[YOUR AFFILIATE LINK]

If you've been on the fence about this one — the fence has a short life. Launch pricing closes soon.

[YOUR NAME]

P.S. Commercial licence is included. Build products and offers for clients and keep 100% of what you charge. Nobody else in your market can offer this crazy tool at such a discounted price.

Hey [First Name],

This is the last time I'll mention OfferMint AI.

If you're ready — here's the link: **[YOUR AFFILIATE LINK]**

The launch closes today. The \$17 one-time price goes away. And after that — it's a monthly subscription.

I'm not going to re-explain what OfferMint AI does. If you've seen any of my emails this week you already know.

You know it takes any rough idea and turns it into a complete product, a full offer stack, and a ready-to-use marketing campaign — automatically. You know it builds for Amazon KDP, Etsy and Gumroad from the same idea. You know it comes with a commercial licence — build for clients, keep 100% of what you charge. You know it's a one-time payment with no monthly fees for the entire idea-to-offer workflow. And you know the 50+ traffic sources bonus is capped at the first 48 buyers.

You know all of this.

The only question left is the one that's been sitting in the back of your mind since you first saw it.

"Is this the one I actually take action on?"

Here's how I'd think about it:

Every idea sitting in your notes app right now is worth exactly \$0 until it becomes a product. The planner you've been meaning to build. The guide you keep saying you'll "get to." The concept you told a friend about six months ago and never touched again.

OfferMint AI fixes that from the moment you type the idea in.

Today is the last day to get it at \$17.

[YOUR AFFILIATE LINK]

I'll see you on the other side.

[YOUR NAME]

P.S. The gap between the ideas in your head and the products in your bank account — OfferMint AI closes that gap. The link above is open until tonight. After that — it's gone.
