

Privacy Policy for Chrome Extension

Last Updated: July 13, 2026

Thank you for choosing to use our Chrome Extension (the "Extension"), the Ultimate Swiss Army Knife for detecting website tags and tracking codes. We are committed to protecting your personal information and your right to privacy. If you have any questions or concerns about this privacy notice or our practices with regard to your personal information, please contact us.

1. Information We Collect

We do not collect, store, or transmit your personal data.

Our Extension operates locally within your browser. Its primary function is to scan the current webpage you are visiting to detect installed tracking codes, pixels, and marketing tags (such as Google Ads, Meta Pixel, TikTok Pixel, GA4, etc.) and extract their respective IDs for your viewing.

- **No Personal Data:** We do not require you to create an account, and we do not collect personal information such as your name, email address, or browsing history.
- **Local Processing:** All detection and extraction processes happen locally on your device. The Extension does not send the detected tags, website URLs, or tracking IDs to our servers or any third-party servers.

2. How We Use Information

Because the Extension processes information locally and we do not collect data on our servers, there is no data for us to use, sell, rent, or share. The information extracted by the Extension (e.g., tracking codes) is used solely to display the results to you within the Extension's interface in your browser.

3. Permissions Required

To function correctly, the Extension requires certain browser permissions:

- **activeTab / tabs:** Allows the Extension to access the source code and network requests of the active webpage you are currently visiting in order to identify and extract the tracking codes and pixels.
- **storage (optional):** May be used to save your local user preferences (such as UI settings or history of your recent scans) directly on your device.

4. Third-Party Services

While our Extension detects scripts and pixels from third-party services (such as Google, Meta, Adobe, HubSpot, etc.), it is not affiliated with, endorsed by, or connected to these companies. The Extension only reads the public-facing scripts loaded on the web pages you visit.

5. Data Security

Since we do not collect or transmit your data to external servers, the security of the data handled by the Extension is tied to the security of your own device and browser. We recommend keeping your browser and operating system updated to ensure your local data remains secure.

6. Changes to this Privacy Policy

We may update this Privacy Policy from time to time in order to reflect changes to our practices or for other operational, legal, or regulatory reasons. The updated version will be indicated by an updated "Last Updated" date at the top of this document.

7. Contact Us

If you have questions or comments about this policy, or if you need to report an issue, please contact us at: **janaka.works@gmail.com**
