

Hello there,

Copy this code below, go to Max, then select the “File” drop down menu and select “New From Clipboard”. The patch should open just fine.

If the Max MSP file does not open directly to a clean UI but instead a mess of wires, be sure to go to the bottom left of the patcher window to lock the patcher and put it into presentation mode in order to see the patcher as it is meant to be seen.

Enjoy!

Jack
