

Data Nuggets

An overview

[Data Nuggets Link](#)

What is it?

How can these be useful?

Data Nuggets focus on themes related to **environmental issues**, ecology, animal and plant behaviors and adaptations, biodiversity, community and population interactions, human impact on the environment, climate issues, etc.

- Each nugget has a short real-life research project **article** (ranging in reading levels from elem to post-high school), a **data set**, and space to create and/or analyze a **graph**. Questions are included to **analyze the data** by making **claims**, and providing **evidence** and **reasoning** to support analysis.
- Data Nuggets are **FREE** and easy to download, share, and print. Spanish versions are available. Teacher guides can be requested on the website for additional support.

Attached are some links to samples to preview:
