Signature of Applicant

Request for TEMPORARY CHANGE IN LOCATION OF WELL _____

(granted/denied)

this _____ day of _____, 20 _____, for the irrigation season of _____ only.

_____

SUPERINTENDENT, WATER DIVISION ____

TEMPORARY CHANGE IN WELL LOCATION. The division superintendents are authorized to issue temporary changes of location for ground water wells for short periods of time (up to a maximum of one water use season). The affected ground water right must be a valid appropriation.

Note: If the well involved is located in a ground water control area, the superintendent may approve the temporary change; however, he should consult with the State Engineer's Ground Water Division prior to acting on the request. *(Recommendation of the Control Area Advisory Board will be required prior to approving a permanent change in well location.)*

Approval for a temporary change shall not be given if there is a likelihood of injury to any other appropriator. In no case shall an increase in water use (yield, acres irrigated, area(s) or point(s) of use) by a temporary change be tolerated. The superintendents shall forward copies of all temporary change requests and approvals to the Board of Control in Cheyenne.

If a permanent change is to be requested, a proper petition must be filed with the Board during the period of temporary change. The approval for a temporary change does not in any way guarantee that the State Board of Control will approve a permanent change.

A request for temporary change must be made on the following form and must be approved in writing by the appropriate superintendent prior to making the change. (SEE FORM ON REVERSE SIDE)
