ABSTRAK

This document gives formatting instructions for authors preparing papers for publication in the Journal of Vocational Fashion and Art. The authors must follow the instructions given in the document for the papers to be published. You can use this document as both an instruction set and a template into which you can type your own text. Proceeding requires the authors to cite at least fifteen sources, and all the citations in-text must be synchronized with references. It is highly recommended to use a citation manager to ensure citation synchronization. **The word number in abstract should be within 230-250 words and consists of objectives, materials, method, results, and implication for further research.**

Keywords— Put your keywords here; keywords are separated by a semicolon.

INTRODUCTION (1,5 – 2 pages)

The minimum number of pages in a single article is 6 pages. The manuscripts should be the original work either as a research or reference studies which have never been published in any form of publication. The manuscript is single-spaced, written in one columns format, Times New Roman 11pt on A4 paper (quarto). The margin text from the top, left, right, and bottom are 3 cm, 4 cm, 3 cm and 3 cm respectively. The suggested organization of the paper consists of: Introduction - Methods - Results and Discussion – Conclusion – Acknowledgment - References. Each part should explicitly declare the contents.

A title should be the fewest possible words that accurately describe the content of the paper. Indexing and abstracting services depend on the accuracy of the title. An improperly titled paper may ever reach the audience for which it was intended, so be specific. Do not use abbreviations in the title unless they are unavoidable. The introduction should provide a clear background, a clear statement of the problem, the relevant literature on the subject, the proposed approach or solution, the new value of research and end with the purpose of the study.

References need not be cited in text. When they are, number citations on the line, in square brackets inside the punctuation. Multiple references are each numbered with separate brackets. When citing a section in a book, please give the relevant page numbers. In text, refer simply to the reference number. Do not use “Ref.” or “reference” except at the beginning of a sentence: “Reference [3] shows” Please do not use automatic endnotes in *Word*, rather, type the reference list at the end of the paper using the “References” style.

Reference numbers are set flush left and form a column of their own, hanging out beyond the body of the reference. The reference numbers are on the line, enclosed in square brackets. In all references, the given name of the author or editor is abbreviated to the initial only and precedes the last name. Use them all; use *et al.* only if names are not given. Use commas around Jr., Sr., and III in names. Abbreviate conference titles. When referencing a patent, provide the day and the month of issue, or application. References may not include all information; please obtain and include relevant information. Do not combine references. There must be only one reference with each number. If there is a URL included with the print reference, it can be included at the end of the reference. Other than books, capitalize only the first word in a paper title, except for proper nouns and element symbols. For papers published in translation journals, please give the English citation first, followed by the original foreign-language citation. See the end of this document for formats and examples of common references.

Literature review is used in the chapter "Introduction" to explain the difference of the manuscript with other papers, that it is innovative, it is used in the chapter "Method" to describe the step of research and used in the chapter "Results and Discussion" to support the analysis of the results.

METHOD

Method includes research chronological, including research design, research procedure (in the form of algorithms, etc.), instruments, and analysis techniques used in solving problems.

CASE

This section should include a detailed description of the case being studied or prototype, to provide an adequate context to the reader. This section may include design, tables, charts/figures/flowcharts or transcripts

DISCUSSION AND RESULTS (6-14 pages)

Results

Research results are presented in graphs, tables, or descriptive. Analysis and interpretation of these results are necessary before they are discussed. For experimental research, the order of presenting the results is adjusted to the research hypothesis, while for qualitative research, it is adjusted to the research questions.

The table is written in the middle or end of each research result/gain description text. The table title is written centered; each word begins with a capital letter. Suppose more than one line is written in a single space. For example, it can be seen in Table 1.

Table 1. Table Title		
Scores	(%) Cycle I	(%) Cycle II
- 100	14.9%	64.5%
- 90	70.5%	37.5%
- 80	19.4%	35.2%
- 60	3.2%	-

The results are in the form of images or data in the form of images/graphs/diagrams/schemes/similar; the presentation also follows the applicable rules; the title or name of the image is placed below the image, centered,, and spaced one space from the image. If more than 1 line between lines is single-spaced. An example of, can be seen in Figure 1.

Figure 1. Figure Title

Make sure all tables and figures are referred to as in Figure 1 and given explanations or interpretations but do not repeat information contained in the tables. This interpretation or explanation can be made by highlighting the things that stand out, the things that are the same, or the differences. All tables and figures must be referred to (mentioned) in the manuscript's text. Avoid making mentions by saying "can be seen in the table above/below," but immediately mention "can be seen in Table 1" or "... as presented in Figure 1".

When writing the formula, write it in full using the Insert Menu "Equation." The following is an example of Formula 1.

$$E(F) = E(0) + \sum_i \left(\frac{\delta E(F)}{\delta F_i} \right) F_i \quad (1)$$

Discussion

The discussion is focused on linking the data and the analysis results to the problems or research objectives. The discussion also links research results or findings with relevant research results and theories. The discussion also answers the question of why such facts are found in the data.

The discussion also outlines the contribution of research results or findings to relevant fields, especially educational administration/management, consisting of educational leadership, policy and planning, academic economics, and educational politics. The discussion also outlines the limitations of the research and its implications for practice and research opportunities in the future. We recommend that the words in the discussion are at least 70% of the words in the results.

CONCLUSION

The conclusion is a summary of the results and discussion and should be written in paragraphs instead on numbering. Moreover, it can also be added the prospect of the development of research results and application prospects of further studies into the next (based on results and discussion).

ACKNOWLEDGMENT

This research was supported/partially supported by [Name of Foundation, Grant maker, Donor].

REFERENCES

All references should at least consist of 15 most pertinent and up-to-date sources. 60% of the references must be from reputable national/international journals published in less than 5 years. Give all authors' names; use "et al." if there are six authors or more. Papers that have not been published, even if they have been submitted for publication, should be cited as "unpublished". Papers that have been accepted for publication should be cited as "in press". See the examples below. It is highly recommended that the references are written with the **MENDELEY** reference management application.

Basic format for books:

- [1] J. K. Author, "Title of chapter in the book," in *Title of His Published Book*, xth ed. City of Publisher, Country if not
- [2] USA: Abbrev. of Publisher, year, ch. x, sec. x, pp. xxx-xxx.

Examples:

- [3] G. O. Young, "Synthetic structure of industrial plastics," in *Plastics*, 2nd ed., vol. 3, J. Peters, Ed. New York: McGraw-Hill, 1964, pp. 15-64.

Original Research

ABSTRAK

This document gives formatting instructions for authors preparing papers for publication in the Journal of Vocational Fashion and Art. The authors must follow the instructions given in the document for the papers to be published. You can use this document as both an instruction set and a template into which you can type your own text. Proceeding requires the authors to cite at least fifteen sources, and all the citations in-text must be synchronized with references. It is highly recommended to use a citation manager to ensure citation synchronization. **The word number in abstract should be within 230-250 words and consists of objectives, materials, method, results, and implication for further research.**

Keywords— Put your keywords here; keywords are separated by a semicolon.

INTRODUCTION (1,5 – 2 pages)

The minimum number of pages in a single article is 6 pages. The manuscripts should be the original work either as a research or reference studies which have

never been published in any form of publication. The manuscript is single-spaced, written in one columns format, Times New Roman 11pt on A4 paper (quarto). The margin text from the top, left, right, and bottom are 3 cm, 4 cm, 3 cm and 3 cm respectively. The suggested organization of the paper consists of: Introduction - Methods - Results and Discussion – Conclusion – Acknowledgment - References. Each part should explicitly declare the contents.

A title should be the fewest possible words that accurately describe the content of the paper. Indexing and abstracting services depend on the accuracy of the title. An improperly titled paper may never reach the audience for which it was intended, so be specific. Do not use abbreviations in the title unless they are unavoidable. The introduction should provide a clear background, a clear statement of the problem, the relevant literature on the subject, the proposed approach or solution, the new value of research and end with the purpose of the study.

References need not be cited in text. When they are, number citations on the line, in square brackets inside the punctuation. Multiple references are each numbered with separate brackets. When citing a section in a book, please give the relevant page numbers. In text, refer simply to the reference number. Do not use “Ref.” or “reference” except at the beginning of a sentence: “Reference [3] shows” Please do not use automatic endnotes in *Word*, rather, type the reference list at the end of the paper using the “References” style.

Reference numbers are set flush left and form a column of their own, hanging out beyond the body of the reference. The reference numbers are on the line, enclosed in square brackets. In all references, the given name of the author or editor is abbreviated to the initial only and precedes the last name. Use them all; use *et al.* only if names are not given. Use commas around Jr., Sr., and III in names. Abbreviate conference titles. When referencing a patent, provide the day and the month of issue, or application. References may not include all information; please obtain and include relevant information. Do not combine references. There must be only one reference with each number. If there is a URL included with the print reference, it can be included at the end of the reference. Other than books, capitalize only the first word in a paper title, except for proper nouns and element symbols. For papers published in translation journals, please give the English citation first, followed by the original foreign-language citation. See the end of this document for formats and examples of common references.

Literature review is used in the chapter "Introduction" to explain the difference of the manuscript with other papers, that it is innovative, it is used in the chapter "Method" to describe the step of research and used in the chapter "Results and Discussion" to support the analysis of the results.

METHOD

Method includes research chronological, including research design, research procedure (in the form of algorithms, etc.), instruments, and analysis techniques used in solving problems.

RESULTS AND DISCUSSION (6-14 pages)

Results

Research results are presented in graphs, tables, or descriptive. Analysis and interpretation of these results are necessary before they are discussed. For experimental research, the order of presenting the results is adjusted to the research hypothesis, while for qualitative research, it is adjusted to the research questions.

The table is written in the middle or end of each research result/gain description text. The table title is written centered; each word begins with a capital letter. Suppose more than one line is written in a single space. For example, it can be seen in Table 1.

Table 1. Table Title		
Scores	(%) Cycle I	(%) Cycle II
90 –	14.9%	64.5%
74 –	70.5%	37.5%
60 –	19.4%	35.2%
0 – 60	3.2%	-

The results are in the form of images or data in the form of images/graphs/diagrams/schemes/similar; the presentation also follows the applicable rules; the title or name of the image is placed below the image, centered,, and spaced one space from the image. If more than 1 line between lines is single-spaced. An example of, can be seen in Figure 1.

Figure 1. Figure Title

Make sure all tables and figures are referred to as in Figure 1 and given explanations or interpretations but do not repeat information contained in the tables. This

interpretation or explanation can be made by highlighting the things that stand out, the things that are the same, or the differences. All tables and figures must be referred to (mentioned) in the manuscript's text. Avoid making mentions by saying "can be seen in the table above/below," but immediately mention "can be seen in Table 1" or "... as presented in Figure 1".

When writing the formula, write it in full using the Insert Menu "Equation." The following is an example of Formula 1.

(1)

Discussion

The discussion is focused on linking the data and the analysis results to the problems or research objectives. The discussion also links research results or findings with relevant research results and theories. The discussion also answers the question of why such facts are found in the data.

The discussion also outlines the contribution of research results or findings to relevant fields, especially educational administration/management, consisting of educational leadership, policy and planning, academic economics, and educational politics. The discussion also outlines the limitations of the research and its implications for practice and research opportunities in the future. We recommend that the words in the discussion are at least 70% of the words in the results.

CONCLUSION

The conclusion is a summary of the results and discussion and should be written in paragraphs instead on numbering. Moreover, it can also be added the prospect of the development of research results and application prospects of further studies into the next (based on results and discussion).
