

What is Bxie Infinity (BXS)? Why should you participate in Bxie Infinity presale?

Bxie Infinity is a play-to-earn game forked by Axie infinity, aimed to build a metaverse game world. Members can earn crypto by PvP or PvE model, and even by breeding Bxies.

While Axie Infinity has reached up to 1,377x ROI after initial listing, its play-to-earn mechanisms have become very popular worldwide. But there are some questions that Axie Infinity have to solve: too much cost for beginners, too complex for members and another important thing is the marketcap is too high.

Bxie Infinity is forked by Axie Infinity with lower cost and more easy to play, we have following advantages:

First, Bxie Infinity is cheaper and easier to play. Bxie Infinity is based on Binance Smart Chain with a much lower gas fee and without installing any client. and Bxies price is much cheaper than Axies, which means more easy to participate.

Second, you can earn money by inviting your friends. Bxie Infinity has designed a very professional invitation system, that means members, players, youtubers and other KOLs can earn profit by inviting their friends. There will be a lifetime attribution for referrals and no invitation limits. Invite more, earn more!

Third, Bxie Infinity has a great potential to become the leader of Gamefi at Binance Smart Chain. Axie Infinity marketcap has up to 34 billion while Bxie Infinity is initial listing marketcap is only 27M. **Bxie Infinity is** just the beginning and not have too much competitor on binance smart chain. Due to the success of Axie Infinity, we believe Bxie Infinity has great potential to become the leader of Gamefi.

BXS tokenomics

Bxie Infinity(BXS) is a BEP-20 governance token for the Bxie Universe. BXS holders will be able to claim rewards if they stake their tokens, play the game, and participate in key

governance votes. Players will also be able to earn \$BXS when they play various games within the Bxie Infinity Universe and through user-generated content initiatives.

Staking: Staking is a way to reward the community for having a long term mindset and locking up their BXS tokens. By staking your BXS you'll be able to earn BXS rewards when you lock up your tokens through the staking dashboard. 29% of total supply will be rewarded to the community.

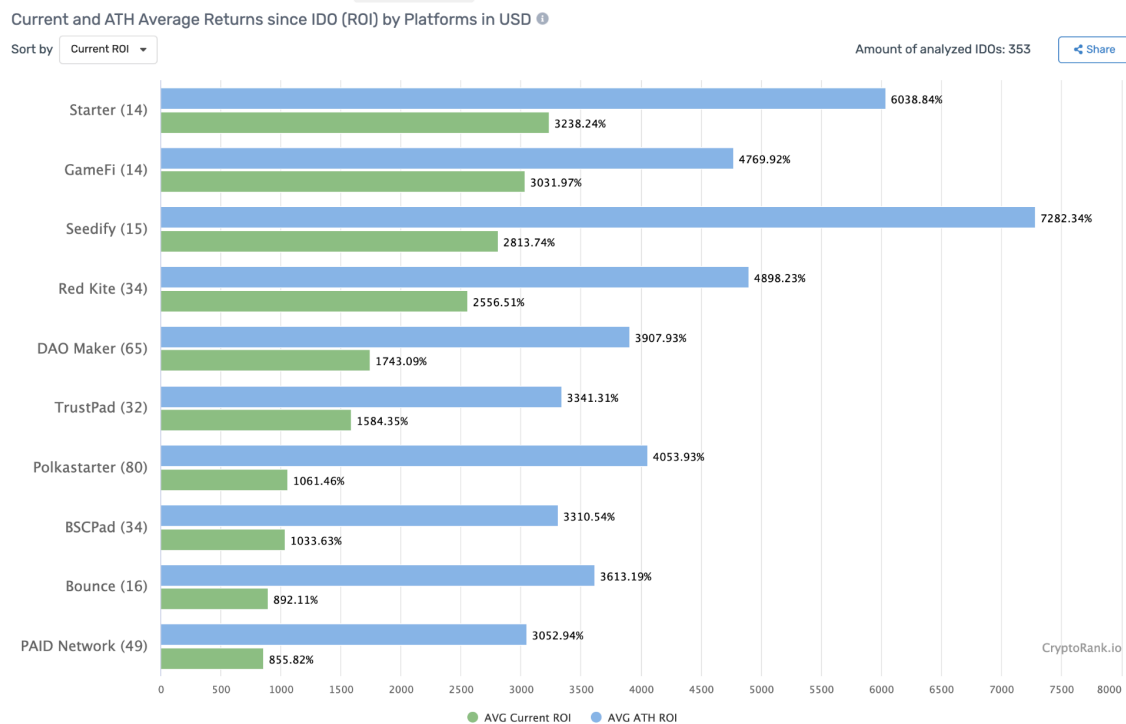

Breeding: players can use BXS and BLP to breed Bxies to earn more profit.

Prizes: players will get BXS prizes after they win the games, the top 1,000 players on the leaderboard will receive an AXS prize.

Why should you participate in Bxie Infinity presale?

Let's make a scope of IDO in the past few months:

In the past few months, most IDO projects had a very nice performance, with the maximum ROI up to 7287%, that's really an opportunity for members to earn profit. We can't predict the performance of BXS tokens after listing, but most probably it will be very well. Let's imagine that, BXS initial fully marketcap is only 27M while AXS is 34B, if Bxie Infinity is 1/10 of Axie Infinity, it's marketcap will up to 3.4B, that means BXS will pump 12592% after listing. Really nice investment, right?

If you not agree with me, let make a comparison, Sushiswap is forked by Uniswap and have a success, Sushiswap marketcap is 3.2B and Uniswap is 27B, it's around 7x, so if Bxie Infinity is success, it's will have a very nice performance.

How and where can I participate in the BXS presale?

BXS presale is fair for everyone, there is no whitelist, no KYC, everyone can participate in presale permissionless.

Note: the only way to participate in presale is the official web, be careful of scams.
