Subj: Re: Dulce expedition

I got a long letter from Paul Bennewitz in which he wanted me to put this onto bbd. I am copying verbatim what he says:
--1) The Archeleta Base was raided by a Delta Force, and of the The Aliens within were killed outright. I can not vouch for some of this although I have absolute proof that it was. It is said that a General, a U.S. officer; he apparently got into an argument in that they, the Alien, were making Cocaine, instead of making humanoids. Supposedly there was 16 Tons of piled in one room. One of them, apparently, one he was talking to used a Blaze Gun, which is similar to a minature flame thrower and burned him severly. He sent his Aide to call for help and the Delta Force was there in a very short time. When they saw what happened, knowing the General had one leg near burned off, attacked in a frenzy and killed at least 120 of them. Some of the Delta Force were also burned badly, and some were lost due to shock etc.,. They were apparently making the stuff so that they could sell it on the street. In the final count, later, apparently 8 Tons of the stuff was missing. There was a covert landing strip just North of Archeleta and they were flying it out of there. The troupes blew the whole operation to hell bringing down all entrances and totally destroyed the so call-plastic worms, killing those within. All instrumentation was destroyed. The whole area was closed and all people were bared from the mountain; it is now administrated by the Drug Administration (U.S.), so it is finished. The air strip was plowed and barricaded.

--2) About 80 escaped taking their ships with them; some were out on patrol and thus they got away. 40 some odd established themselves in caves at Bear Mountain, in New Mexico. The rest went to what is called, THE DOME, and are still at large.

--3) I have contacted the Secretary of Defense, and a Senator; also General Jaco and the new Administrator at Kirtland. Some is attached to give the Coordinates which are fairly accurate.

--4) Those that are in Bear Mountain, N.W. of Magdalena are raiding raiding and attempting to gain entrance. The prime and important point is that a humanoid who is in charge by the name CARAUICHE is using a beam over the four hills area where I live and are hitting people in the nerve endings that control the stomach's Hcl, or hydrochloric acid causing the acid to come up the esophagus. Thus causing one to either throw up or become badly burned in the mouth and esophagus area. They hit at night and hit me last night. Fortunately, I had some anti acid Mallox so it reduced the pain. The odds are if they do it in this area, they will start elsewhere. They are beginning to take victims and they have no processing area yet, they are trying to sell them to other bases that still exist.

They have been threatening me constantly trying to take out the computers and continue all day. It appears that they have also discovered that with a small beam that they can intrude on a person's thought WITHOUT AN IMPLANT. They started to attack me right after the raid which occurred about 2 years ago; thinking that I was the one that instigated it. That was obviously not true. They triggered the onslaught by shooting the General.

They also were very angry when I turned my back on them and threw ALIEN DATA away. My reason? I just did not have a desire to study IGNORANCE of humanoids, and intend never to do any more of it. It's over with.

I am sending this to you in hopes that others may be aware of what they should be on the guard for. Other than that I am finished with them. ----- Paul Bennewitz

Postscript note: Ken Willoughby. When you study Paul's material, you are left with a doubt who got to him.
