APR 14

COMMONS SWARM
- Progress on Commons Upgrade Vote
- Working with Gardens on the Gardens Template
- Hatch Configuration Dashboard
- Adria Code Review is nearing completion, last step is to review the voting permissions
- Hatch Smart Contract will be used as an example of well written code for a college course

TEC - HOW WE DOIN' AT COMMONS SWARM
-

APR 7

COMMONS SWARM
* The smart contracts for the hatch are ready and being reviewed by Adria Massanet. A new [Hatch Demo](https://hatch-demo.netlify.app/) is live for our first user, the TEC. Feel free to share any thoughts and issues in our Github.
* We announce an [Aragon connector](https://connect.aragon.org/) for the [hatch subgraph](https://github.com/TECommons/hatch-connector). Our beloved bee @paulo has put special attention in its documentation, making it a great resource for any DAO that wants to use Aragon Connect in 1hive.
* We are having a [Smart Contract Verification party](https://forum.1hive.org/t/contract-verification-party/3369) at 16:00-18:00 on Thursday, April 8th. We are going to upload the solidity code for the missing 1hive smart contracts in blockscout, making the whole ecosystem more secure and trustworthy.
* Our friends at TEC Comms are looking for publishers and distributors for its content. If you're interested in getting closer to the TEC's work, please contact @chuygarcia92 or @markoprljic.

TEC - HOW WE DOIN' AT COMMONS SWARM
* We announce an [Aragon connector](https://connect.aragon.org/) for the [hatch subgraph](https://github.com/TECommons/hatch-connector). Our beloved @paulo has put special attention in its documentation.

* Invitation to server boost < Do this in the TEC forum! Leave 1hive out of it!
* Brief people about contract changes with 1hive and implementation of Celeste
* We're looking for publishers and distributors in TEC Comms! If you're interested in contributing through content management please contact @chuy, @markoprljic or @natesuits.

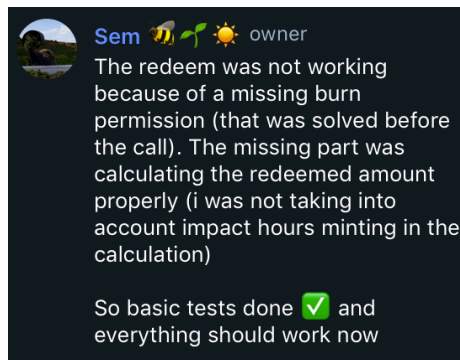

MAR 31

Wednesday's Weekly Commons Update - March 31

Hello 1hive! It's been a while and we have a lot of good news to share with you!

Some of this week's advances
* @sem and @paulo have been working hard in getting the hatch ready. After many weeks of challenges, the tests are done!

* Tomorrow we'll be running a demo for the hatch front end. We're anxious and looking forward to sharing results with the community next week!
* We would like to give a shoutout to @gabi for helping us run template tests on a local xdai fork! This means that we can now simulate a bunch of transactions and see what the final result is before we actually perform them. This consists in [a tool](https://github.com/CommonsSwarm/hatch-template) for running tests on a DAO before deploying it. This is useful in cases where migration of DAOs occurs such as the ones that are going to be performed by Agave and 1Hive.

Some cool stuff you can check out:
* [The Commons Simulator Game](https://medium.com/commonsstack/the-commons-simulator-game-is-live-e1986615a105): See if You Can Save the Future with cadCAD, RadicalxChange & The Commons Stack.
* @mzargham's new post in the TEC Medium is mindblowing: [Engineering Ethics in Web3](https://medium.com/token-engineering-commons/engineering-ethics-in-web3-18d981278018)
* Thanks to everyone who donated to [our Gitcoin Grant](https://gitcoin.co/grants/2388/the-commons-swarm-an-augmented-bonding-curve-model)
* [The Commons Swarm AMA](https://youtu.be/VpkM46h5g5g)

* This infographic made by @EFRA:

See you next Monday in the Commons Swarm weekly meeting @**6:00 PM UTC**!

FEB 17

Wednesday's Weekly Commons Update - Feb 15-21

Hello 1hive! This new thread will have the same function as its [predecessor](https://forum.1hive.org/t/getting-closer-to-the-gardens-swarm/1977), but regarding the new Commons Swarm comms.

Read our funding proposal [here](https://forum.1hive.org/t/commons-swarm-emerges-from-the-gardens-swarm/2301).

Quick recap: In order to improve the marketing and onboarding to communities using Conviction Voting and to better scope the work for this Swarm, we are going to rename "Gardens Swarm" to "Commons Swarm" and focus on what was considered the ["Commons Template" Flavor of Gardens](https://forum.1hive.org/t/getting-closer-to-the-gardens-swarm/1977) which uses the [Augmented Bonding Curve](https://medium.com/commonsstack/deep-dive-augmented-bonding-curves-b5ca4fad4436)for issuance and Hatch for Initialization, will now not be considered a flavor of Gardens but actually just it's own thing.

Some of the last deliveries from the swarm include these 4 pieces of the DAO, please take these in consideration for supporting our funding proposal:

* **Hatch**: We adapted Aragon Black's fundraising app (Specifically Presale.sol) and upgraded it to use Aragon connect. Here's the second iteration: hatch.tecommons.org

* **ABC**: We adapted Aragon Convert to use 1hive Marketplace (which converts tokens without batching). You can exchange TESTTEC Tokens via an Augmented Bonding Curve: convert.tecommons.org
* **CV**: We adapted 1hive Honeypot v1 to be used with two tokens, and adjusted the governance token price oracle to read from the bonding curve instead of Honeyswap. You can vote with Conviction Voting Here: gov.tecommons.org
* **DV**: We ran a demo of 1hive Dandelion Voting with the TEC community here: [TEC Test Dandelion Voting App
](https://aragon.1hive.org/#/0xd0817aa0f770d024f42f0222dba37536a05118dc/0x43f438d7fa348db3cc77200855b3a804d3e2a3f1/). This will be replaced with disputable voting once it is ready.

Some of this week's advances:

* The Commons Swarm holds a weekly meeting **every Monday at 7PM UTC**. Feel free to jump in!
* A lot of documentation and sensemaking around the various parameters [has been happening in the TEC Forum
](https://forum.tecommons.org/c/Token-talk-anything-about-the-TEC-token-such-as-issuance-and-hatches/9) to reduce the reliance on technocracy to design cryptoeconomies, including a [very nice design dashboard](https://tec-hatch-demo.herokuapp.com/app) that will make it much easier for communities to launch 1hive DAOs on xDai.
* Our [funding proposal](https://forum.1hive.org/t/commons-swarm-emerges-from-the-gardens-swarm/2301) is up! Come and participate in the discussion, the Commons Swarm needs the 1hive community to get involved.

See you next Monday in the Gardens weekly meeting @**7:00 PM UTC**!
