

MATH SUMMER ASSIGNMENTS 2024

Listed below are the summer assignments for students entering grades 1 – 12. Students must complete practice problems to the best of their ability prior to the first day of the 2024-2025 school year. At the beginning of the school year, time will be given to review solutions in class. In several courses in middle school and high school, an assessment will be given after a thorough review of the material. (Please check the cover letter of the assignment that indicates the requirements for each course) Mastery of the fundamental concepts outlined is essential to your child's success in their future math class.

Have a safe and happy summer. We look forward to a successful opening of the new school year.
