**Soil Solutions Project - Think Global Act Local**

**Part 1:**

You have worked so hard in creating solutions on how to improve soil health. Now it's time to discuss and reflect on our work with our groups!

Instructions: In your project groups, reflect on how you think you did on your Soil Solutions Project. Talk with your group, reflect, and write your responses in the corresponding boxes. Each student should be completing their own reflections page for credit!

| I think that the strongest thing about my project is... |
| --- |

| The part that I am most proud of is...Why? |
| --- |

| To make my project stronger, I think I could work on... |
| --- |

**Part 2:**

We have worked hard to try and find ways we can improve the soils within our community! Soil health is essential in both the fight against climate change and feeding our global population. Each of you has created a solution to improve soil quality but now it's time to take it a step further - make an action plan!

Instructions: Create an action plan on how you can advance regenerative agriculture in your community and improve soil health. Answer the questions below and add specific action items you can do in your home/community to improve your local soils. These should be practical action items that anybody can do to help improve soil.

| How do I advance regenerative agriculture in my community and improve soil health? |
| --- |
| Action Item #1 - |
| Action Item #2 - |
| Action Item #3 - |
