

Youtube Premium Free Trick - QUICK GUIDE : Watch YouTube Ad-Free & Background Play

A short, attractive step-by-step guide you can share with friends (copy into Word or share this file).

What this guide shows

This guide explains the fastest way to open YouTube from the **JioSphere** app homepage so you can enjoy ad-free video streaming and background audio (lock-screen playback). Results may vary slightly by device and app version.

What you need

- A smartphone (Android or iPhone)
- Internet connection (Wi-Fi or mobile data)
- **JioSphere** app installed (latest version recommended)

1. Download & Open JioSphere

- Open the **Play Store** (Android) or **App Store** (iPhone).
- Search for **JioSphere** and install the app.
- Launch **JioSphere** and allow any permissions it asks for.

Tip: If you already have the app, make sure it's updated to the latest version for best results.

2. From the homepage — tap the YouTube tile

- When JioSphere opens, look at the **homepage** (the main screen).
- You should see a tile or quick-link labelled **YouTube** (often shown with the YouTube icon).
- Tap that **YouTube** tile once.

3. Watch ad-free within JioSphere

- Tapping the YouTube tile opens YouTube inside the JioSphere app (a web/app view).
- Play any video — ads are typically suppressed inside this view so you can enjoy uninterrupted watching.
- Use the normal playback controls to pause, skip, or change quality.

Note: This behaviour depends on the JioSphere build and your device — if you see ads, try the troubleshooting steps below.

4. Play audio in background (lock-screen music)

- Start a video and then press your phone's power button or lock the screen.
- Audio should continue playing in the background (this mimics YouTube Premium's background-play feature).
- If audio stops when the screen locks, open recent apps and allow JioSphere to run in background or disable battery-saver for JioSphere.

5. Handy tips & tricks

- **Sign in** to your Google/YouTube account inside JioSphere if you want to access subscriptions and watch-later lists.
- For full-screen viewing, rotate your device after the video starts.
- If captions are needed, toggle subtitles from the player controls.

6. Troubleshooting (quick fixes)

- **No YouTube tile?** Update JioSphere or reinstall the app.
- **Ads still appearing?** Clear JioSphere cache (Settings → Apps → JioSphere → Storage → Clear cache) and try again.
- **Background audio not working?** Allow background activity for JioSphere in phone settings and turn off aggressive battery optimization for the app.
- **Playback errors?** Restart the app and check your internet connection.

FAQ — quick answers

Q: Is this the same as YouTube Premium? A: It gives ad-free viewing/better background behavior *within JioSphere*. Official YouTube Premium from Google covers the YouTube app and other Google services across devices — check YouTube Premium if you want the official subscription.

Q: Can I download videos? A: Download availability depends on what JioSphere/YouTube allows. If downloads are important, consider official YouTube Premium or check the JioSphere features page.
