⚠ Important ⚠

*This product is **ONLY** designed for the current generation Apple MagSafe Charger with 1m length cable.*

Scan the QR code to purchase the correct charger directly from Apple if you do not have the current generation MagSafe.

How to Install Your MagSafe Charger Mount

1. **Insert the Charger:** Line up the plug to the bottom notch and press your Apple MagSafe Charger into the circular indentation on the mount. It should fit snugly.
2. **Wrap the Wire:** Tightly wrap the cable, starting toward the right, around the larger cylinder of the mount.
3. **Mount It:** Slide the mount into your GX cigarette lighter port.
4. **Power Up:** Plug your Apple MagSafe Charger into the left USB-C power port.

Black circular sticker included if you do not like the white color of the Apple Magsafe and want to cover it up.

Fuel and Fire performance parts are intended for off-road and racing use only. By installing or using this product, the user assumes all risk and liability, and Fuel and Fire is not responsible for any damage, injury, or legal implications resulting from its use.
