Chainsaw Contributor Meetings are public, weekly meetings focused on topics relevant to Chainsaw development and other contributions. It's meant for contributors and maintainers to meet, share, and get unblocked, peer review, and discuss all aspects of the Kyverno project. Everyone is welcome and encouraged to attend and join. Edit the agenda (this document) to add new topics. The Chainsaw project abides by the CNCF [code of conduct](#).

Template (copy for each meeting)

At the end of each meeting, please copy and paste this meeting template for the next meeting so that the community can suggest discussion topics in-between. Thanks!
