

## The Environment

With your group, decide on one thing you can do to help the environment.  
Then go out and do it.

Then report back to the class and give a presentation on:

- What you did
- Why you did it
- And how you felt about the experience

Possible things you can do to help the environment:

- Walk to work/school for one week instead of driving
- Take public transportation for one week instead of driving
- Ride a bicycle for one week instead of driving
- Don't use the air-conditioner for one week
- Don't use the television for one week
- Eat vegetarian for one week
- Recycle all your rubbish
- Volunteer to help clean up the streets/parks/rivers in your city
- Volunteer at a recycling center
- Make a newsletter to educate your friends about the environment, and then hand it out to your friends
- Take the stairs instead of the elevator for one week
- Don't take a shower or bath for one week
- Or your own ideas

## Group Plan

|                                                   |  |
|---------------------------------------------------|--|
| Decide on a group name:                           |  |
| Who are the members in your group?                |  |
| How will you contact each other outside of class? |  |
| What is your idea for helping the environment?    |  |
| When is the presentation due?                     |  |
