

We upgraded to a newer version of PowerSchool over Winter Break and entering standard based grades has improved. In a change from the previous setup, grades are entered by standard instead of individual student. This should make grade-entry much faster since you can enter all the standard grades at once using relevant data (i.e. QRI, Dibels, Investigations, etc...) instead of flipping back and forth between various sets of data by student.

- Log on to the PowerTeacher portal and click on the backpack icon.  Select **Standards Grades** at the bottom of the left side menu

- Confirm your Reporting Term is set to **S1**. Click on the blue pencil icon  under each standard. You can now auto fill a standard grade for the entire class and then edit as needed.
