| **Agenda items:** | 1. Breakdown and update requirements/tasks for V2 of app, as specified in our requirements document<br>2. Assign out V2 tasks | **Presenter:** | Multiple |

**Discussion:**

1. The group came together and broke out the tasks to be completed for the V2 of the app. It was decided that the 5 main areas to work on and focus will be:

-Run Module Optimization

-Explore Module Initialization

-Team Stats Framework Initialization

-Offline Functionality

-Additional User Stats and Details

2. The group discussed who had strengths in what areas, and who wanted to work in which sections, and it was decided that Eleanor would be assigned to working on Run Module Optimization, as well as assisting in any issues coming up with Mapbox functionality, Chris would work on initializing the Explore module, Carlos would begin looking at the team stats framework and take a look at the offline functionality work, while Karan would add in the additional stats and user details, while also looking at the offline functionality work

**Conclusions:**   The requirements were looked at and revised for V2 of the app, tasks were broken out for V2, and subsequently assigned to all members of the team.
