ABSTRACT

Clearly state the background of the study, main problem of the study. **Objectives**: State the purpose of the study. **Methods**: Clearly explain the details of research methods and the statistical analysis used in the study. **Results**: Type the results of the study, including the statistical analysis. **Conclusion**: Type the conclusion of your study. Avoid undue extrapolation of the research findings.

Key words: brief and clear description of relevant key words (maximum 5 key words)

INTRODUCTION

Consise, no more than 4 paragraph. The first paragraph consist of introduction of the research.

The second paragraph should clearly state the background of the study,

The third paragraph should address the main problems identified and possible research to be done.

The forth paragraph should address the purpose of the study.

METHODS

State ethical clearance when required. Clearly explain the details of research methods and the statistical analysis used in the study. Subheadings that aid clarity of data presentation are allowed.

Subjects recruitment

Type the methods of subject recruitment, including Ethical issues of the research. Inform consent gained. Number of subjects included, etc.

Specific methods used

Briefly state the methods used in the study. Laboratory consumables used should state the company and catalog number, company and Country of the consumables.

Data analysis

Should state the statistical analysis used in the study. The set of *p*-value of <0.05 with a 95% confidence interval was considered statistically significant should be stated.

RESULTS

Data should be presented in table or figures. Avoid repetition of presenting similar data.

Figures and tables should be included in the body of manuscript. Each figure and table should be numbered consecutively with Arabic numbers, in the order of appearance in the manuscript and accompanied by figure/table legend that clearly describing it. Figure/table titles and table content should be written in 9pt font. Details/explanation of any symbols/abbreviations and units of

measurement must be explained in Table/Figure Legend. All presented tables/figures should be clearly explained in the text. Each Table/Figure has to be self-explanatory.

Once the manuscript has been reviewed, authors are asked to provided separated files of figures and tables. Figure should be saved in the jpeg format and should have minimum resolution of 300 dpi. Table should be saved separately in Excel or any compatible format.

DISCUSSION

(Clearly state the interpretation of the study results and the discussion of the other relevant published data. Avoid the repetition of studies explained in the introduction.)
First paragraph should discuss the interpretation of the results.

Second paragraph should discuss the comparison of the results with other studies.

Third paragraph should discuss the limitation of the study and how to solve the problems.

The fouth paragraph should discuss the implication of the study to the population and general population.

CONCLUSION

Please state the conclusion of the study. Avoid undue extrapolation of the finding of the case report

ACKNOWLEDGMENT

Individuals with contribute in the study but not included in authorship may be acknowledged. The source of financial support and industry affiliations of all those involved must be stated.

CONFLICT OF INTEREST

Should state whether there are possible conflicts of interest related to this study.

REFERENCES

Authors are encouraged to use journal articles published in the last 10 years as the primary references. Articles older than 10 years should not exceed 10% of the articles in the references. Detailed information for reference writing style for JDI, can be found in the International Committee of Medical Journal Editors (ICMJE) Uniform Requirements for Manuscripts Submitted to Biomedical Journals, available athttp://www.nlm.nih.gov/bsd/ uniform_requirements. html. It is the obligation of the author to ensure that all references used are quoted accurately, correct and written according to the guidelines. Each reference quoted should be numbered according to their appearance in the main text of the paper using Arabic number (1,2,3,4, and so on) – superscript. The title of each journal quoted should be abbreviated following the standardized abbreviations, which can be found at http:// www.ncbi.nlm.nih.gov/journals.
