DILO SPACE The Implementation plan scene

Create camera angles similar to original?

(opening Ken working diligently at computer, maybe a Udg Agora screen up)

Alan: Hello, Ken. What's happening? (cut shot to Ken)

(cut back)
Ahhhhh, we have sort of a problem here. Yeaahhhhhhhhhh, we need to talk about your implementation plan.

Ken: Yeah. The plan. I know, I know. Uh, my triad tweeted me about it.

Alan: Yeahhhhhhhh. Did... you…. read the tinyletter? and the Noticias in dilo?

Ken: Yeah. I got the tinyletter. And I understand the sample document.

(cut to Alan sipping coffee looking intently, nodding in disapproval)

 And the problem is just that I emailed it my instructor and my triad. It's turned in so it's not even really a problem anymore.

Alan: Yeaaaaaaaaaaah. It's just we're sharing our plans on dilo now so you can get feedback. That would be greeeeeeat. It's not just homework. So if you could go ahead and try to remember to do share it in dilo, that'd be great. Okay (walks away)

(Add ken's closing line)
