

Salah Shield · Package `com.munexalabs.soulsync.app`

Effective date: 21 July 2026 · **Last updated:** 21 July 2026

Salah Shield ("the app", "we", "us", "our") is developed by Munexa Labs. This policy explains what data the app accesses, how it is used, whether it leaves your device, **how long it is retained, and how you can delete it**. We designed Salah Shield to keep the most sensitive information on your device and to collect as little as possible.

1. Summary

- Your **spiritual tracking data** (Tawbah recovery journal, Salah Shield app-blocking settings, Haram Guard settings, prayer streaks) is stored **only on your device** and is never uploaded to us.
- An **account (email + display name)** is required only if you choose to use the optional community feature ("Ummah Circles"). This is handled by Google Firebase Authentication.
- If you join an Ummah Circle, the **prayer check-ins you choose to share** and your display name are stored in the cloud (Google Firebase) so other members of that circle can see them.
- The **Haram Guard accessibility service** reads only web page titles and URLs, on your device, to block harmful content. This content is **never collected, stored, or transmitted**.
- We show **banner ads** via Google AdMob and do not sell your personal data.

2. Data We Collect and Why

Data	Purpose	Stored where
Email address & display name	Create and secure your account; identify you to your Ummah Circle	Cloud (Firebase Authentication)
Ummah Circle membership & shared prayer check-ins	Enable the optional group accountability feature	Cloud (Firebase Firestore)

Tawbah recovery journal, streaks & recovery logs	Private personal progress tracking	On-device only
Salah Shield & Haram Guard settings (blocked apps, modes)	Operate the app-blocking and content-guard features	On-device only
Approximate (coarse) location	Calculate accurate local prayer times. Optional – a manual city works instead. Not stored by us or transmitted to us.	Used on-device
Web page titles / URLs (via Accessibility Service)	Detect and block harmful web content in real time	Processed on-device, not stored, not transmitted
Advertising identifier	Serve banner ads via Google AdMob	Handled by Google AdMob
Diagnostic / crash information	Only if you contact support and choose to attach it	Sent by you via email

We do **not** use interstitial, app-open, or intrusive ads, and we do not sell personal data.

3. The Accessibility Service (Haram Guard)

With your explicit permission, Salah Shield uses Android's Accessibility API to read the title and URL of the web page currently open in your browser so it can block content you have asked it to block. This happens entirely on your device. The app does **not** record, store, log, upload, or transmit your browsing content, page contents, keystrokes, or personal data. You can disable this service at any time in Android Settings → Accessibility.

4. Data Retention Required disclosure

We retain data only for as long as it is needed for the purpose it was collected, as follows:

Category	Retention period
On-device data (Tawbah journal, streaks, Salah Shield / Haram Guard settings, prayer preferences)	Retained on your device until you delete it in the app, clear the app's storage, or uninstall the app. Uninstalling removes all on-device data. None of this is held on our servers.
Account data (email, display name)	Retained for as long as your account exists. Deleted within 30 days of you deleting your account.
Ummah Circle data (membership, shared prayer check-ins)	Retained while you are a member of the circle. Removed when you leave the circle or delete your account, and permanently deleted from backups within 90 days .
Accessibility content (page titles / URLs)	Not retained. Evaluated in memory in real time and immediately discarded.
Approximate location	Not retained by us. Used momentarily on-device to compute prayer times.
Backups	Residual copies in encrypted cloud backups are purged within 90 days of deletion.

Where we are legally required to keep certain records (for example to comply with law or resolve disputes), we retain the minimum necessary for the minimum period required, after which it is deleted.

5. How to Delete Your Data

- **On-device data:** delete entries in the app, or uninstall the app to remove everything stored locally.

- **Account & cloud data:** open the app → Profile/Settings → *Delete Account*, or email us the request. Your account and associated Ummah Circle data are deleted within 30 days (90 days for backups).
- To request deletion by email, contact us at the address in Section 10.

6. Data Sharing

We do not sell your personal data. We share data only with the service providers that make the app work:

- **Google Firebase** (Authentication, Firestore, Storage) – account and Ummah Circle data. See [Firebase Privacy](#).
- **Google AdMob** – banner advertising. See [Google Privacy Policy](#).

Members of an Ummah Circle you join can see your display name and the prayer check-ins you choose to share with that circle.

7. Security

On-device data is stored in the app's private storage; sensitive local preferences use Android encryption. Data in transit is protected with TLS. Cloud data is protected by Google Firebase security rules and access controls. No method of transmission or storage is 100% secure, but we take reasonable measures to protect your information.

8. Children's Privacy

Salah Shield is not directed to children under 13 (or the minimum age in your country). We do not knowingly collect personal data from children. If you believe a child has provided us data, contact us and we will delete it.

9. Your Rights

Depending on your region (including under GDPR and CCPA), you may have the right to access, correct, export, or delete your personal data, and to withdraw consent. To exercise these rights, contact us using the details below.

10. Contact Us

If you have questions about this policy or wish to request data access or deletion:

Email: ma7273704@gmail.com

11. Changes to This Policy

We may update this policy from time to time. Material changes will be reflected by updating the "Last updated" date above and, where appropriate, an in-app notice. Continued use of the app after changes take effect constitutes acceptance of the updated policy.
