Tomcat 6 Downloads

Welcome to the Tomcat 6.x download page. This page provides download links for obtaining the latest versions of all Tomcat release branches, as well as links to the archives of older releases.

Quick Navigation

[KEYS](#) | [6.0.20](#) | [Browse](#) | [Archives](#)

Release Integrity

You **must** verify the integrity of the downloaded files. We provide PGP signatures for every release file. This signature should be matched against the [KEYS](#) file which contains the PGP keys of Tomcat's Release Managers. We also provide an MD5 checksum for every release file. After you download the file, you should calculate a checksum for your download, and make sure it is the same as ours.

Mirrors

You are currently using <http://ftp.stut.edu.tw/var/ftp/pub/OpenSource/apache>. If you encounter a problem with this mirror, please select another mirror. If all mirrors are failing, there are *backup* mirrors (at the end of the mirrors list) that should be available.

Other mirrors:

6.0.20

Please see the [README](#) file for packaging information. It explains what every distribution contains.

Binary Distributions

- Core:
 - [zip \(pgp, md5\)](#)
 - [tar.gz \(pgp, md5\)](#)
 - [Windows Service Installer \(pgp, md5\)](#)
- Deployer:
 - [zip \(pgp, md5\)](#)
 - [tar.gz \(pgp, md5\)](#)

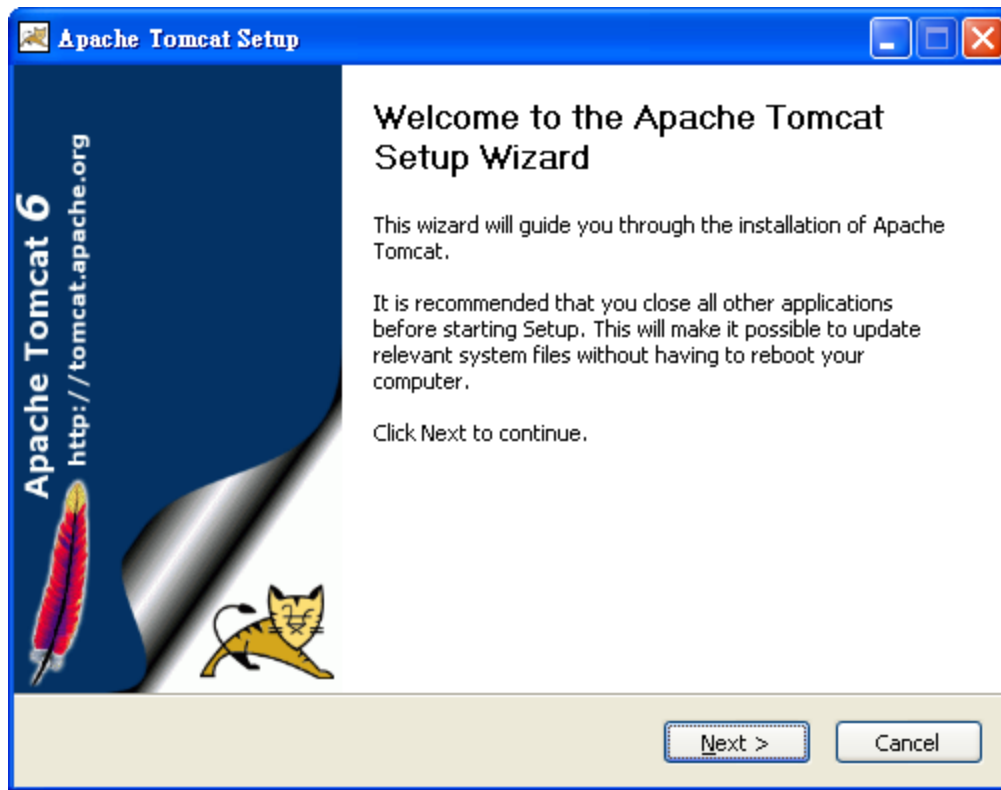

Source Code Distributions

- [tar.gz \(pgp, md5\)](#)
- [zip \(pgp, md5\)](#)

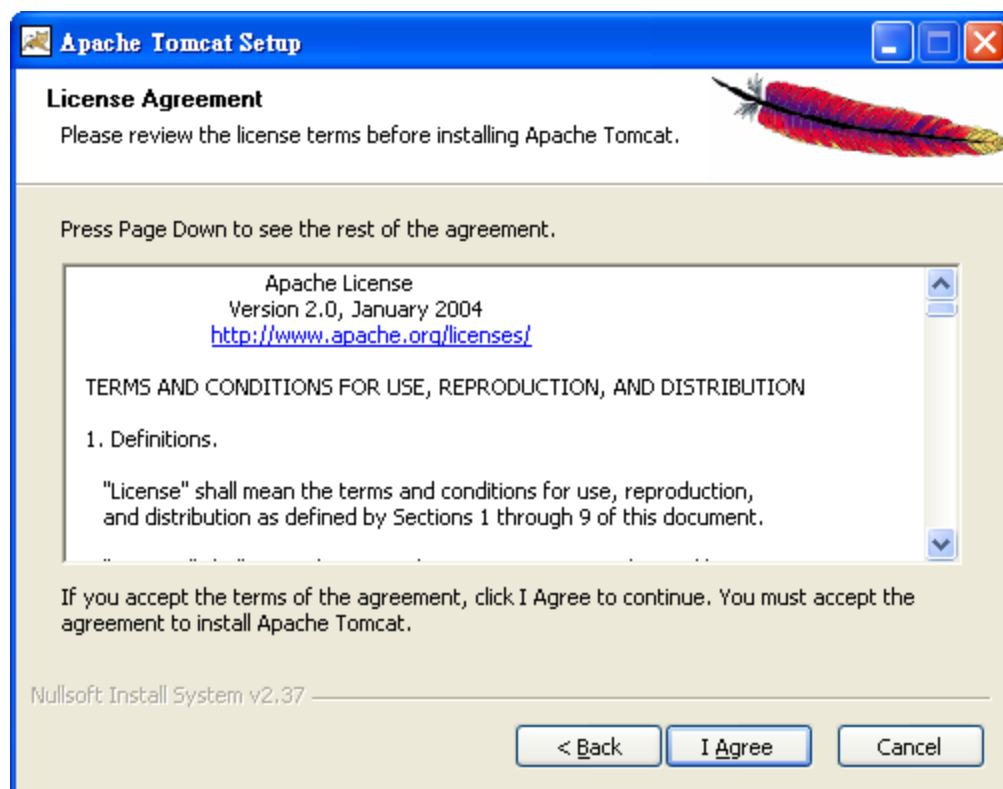

2. 下載Windows Service Installer安裝檔

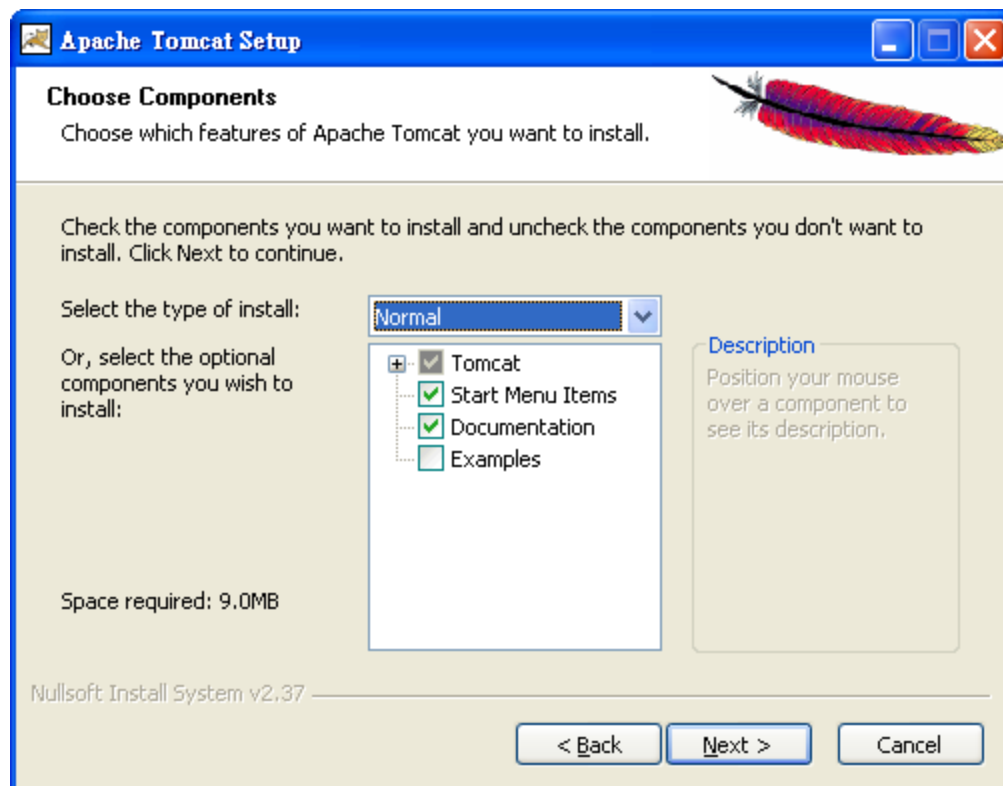

3. 執行安裝程式，出現**Apache Tomcat Setup**安裝精靈，按下一步「**Next**」

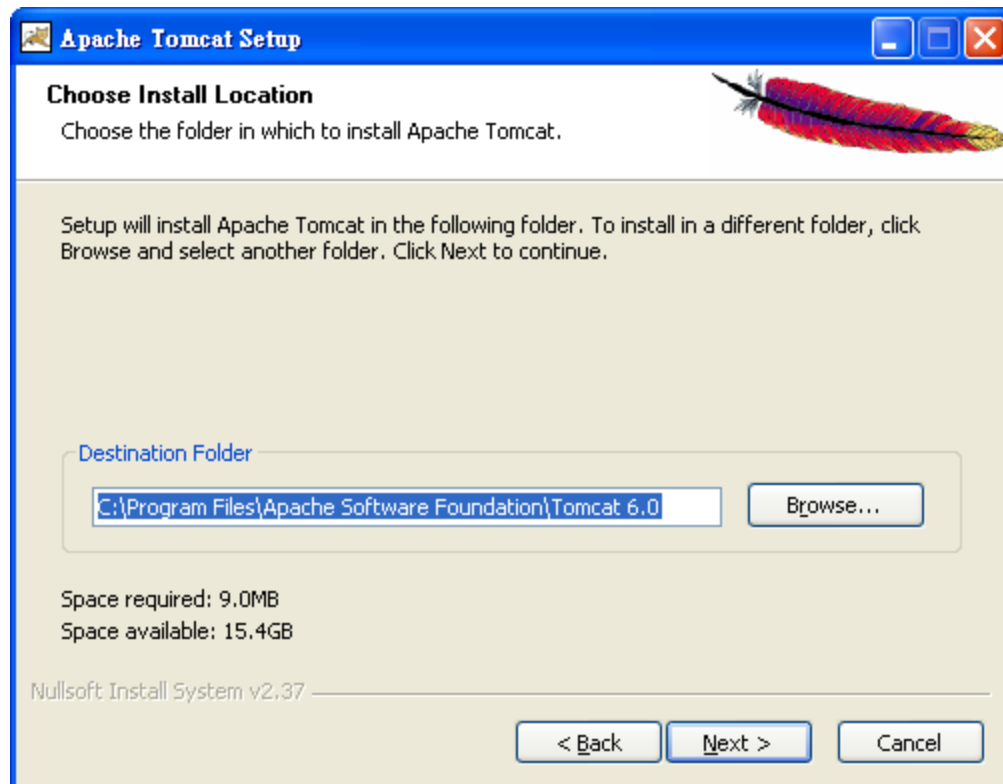

4. 出現許可授權(**License Agreement**)內容，你應該要花點時間閱讀一下。

5. 選擇安裝類型，沒有什麼需求的話，請用一般「Normal」選項

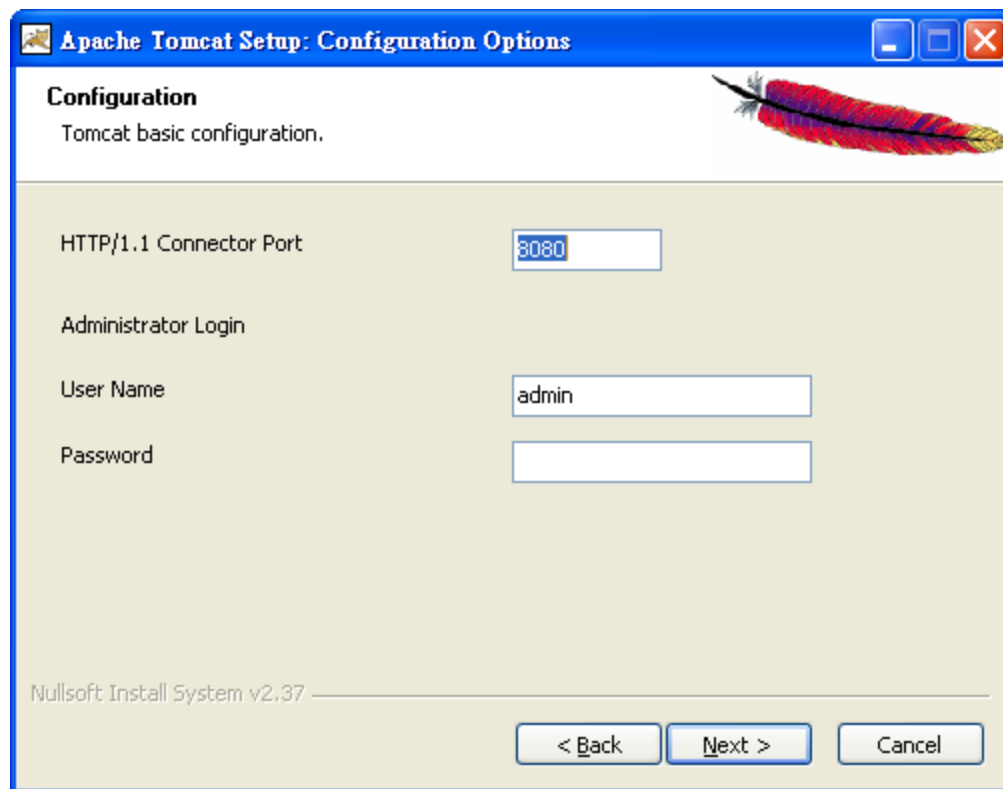

6.選擇Tomcat安裝路徑，一樣的，若沒有需要就用預設！

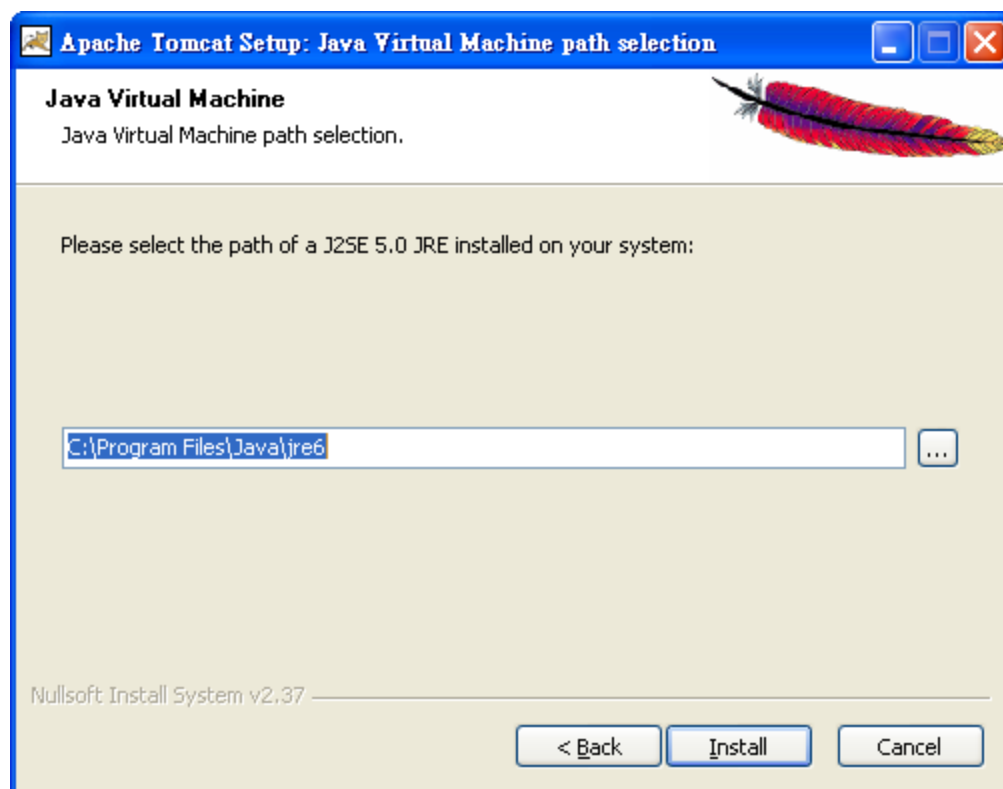

7.組態設定的部分

- **HTTP/1.1 Connector Port**這是Tomcat接收請求的埠號，如果你已經裝Apache的話，需要注意，因為**Port 80**可能已經被用過了，這之後可以修改，所以暫時用**Port 8080**
- 管理員帳號(**User Name**)和密碼(**Password**)，**Tomcat**和**Apache**比較不太一樣，**Tomcat**是**Application Server**，所以**Tomcat**擁有類似控制台地方，可以讓你佈署(**Deploy**)應用程式和設定，於是需要有管理員帳號密碼！

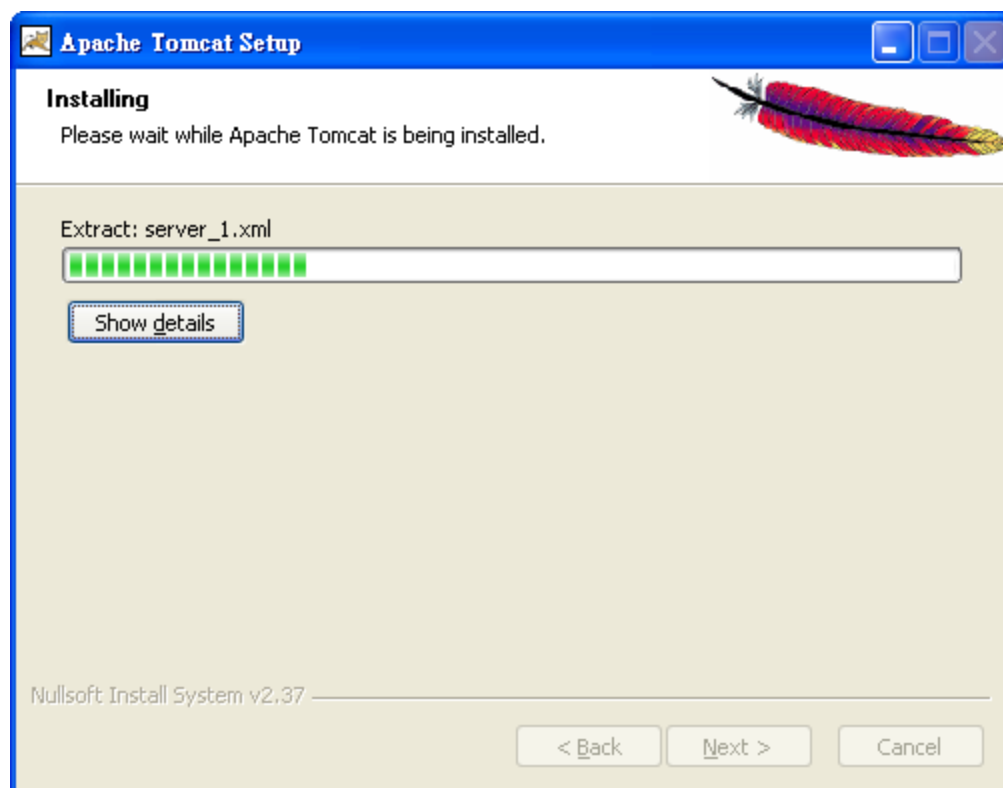

8.設定Java Virtual Machine(JVM)的路徑位置,

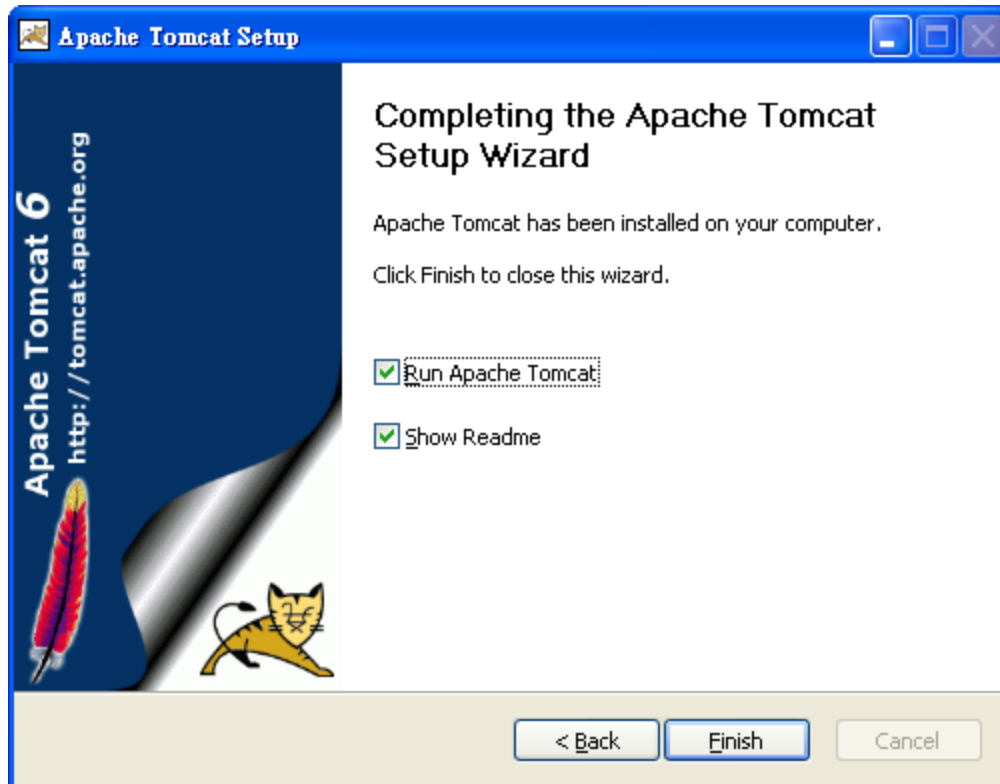

Tomcat是用來執行**Java**的**Web Application**, 故需要底層**JVM**的執行！

9. 按下安裝之後，請等待安裝精靈執行完畢！

10.精靈執行完成，選項請打勾，馬上執行**Apache Tomcat**

11打開瀏覽器，輸入**http://localhost:8080**，你會看到這樣的畫面，表示安裝成功！
