

Philosophy of Catholic Education

I am a strong believer in practicing and integrating God's teachings as a way of life. My goal is to support student's education by creating a safe, culturally diverse, and inclusive classroom environment that fosters their academic, behavioral, socio-emotional, and spiritual growth.

I believe that every child possesses intrinsic value and is created in God's image; therefore, it is our role as educators to not only celebrate their diversity, but also to nourish their God given talents, and strengths. My philosophy of Catholic Education places great importance on establishing and nurturing strong, trusting student relationships to ensure meaningful and productive life-long learning occurs.

I believe that implementing *The Golden Rule* as a guiding principle of life, is essential in developing and maintaining a positive classroom and school culture, filled with a community of respectful, kind, and generous citizens. It is my goal to guide and support students as they discover their spirituality and encourage them to strengthen and explore their faith through various outlets.

I believe that Catholic Education equips students with the necessary skills and tools to deal with any challenges or tribulations successfully and confidently. It is my goal to combine my current skill set and knowledge base with my passion for the Catholic faith, to make a positive impact on children's lives. I am excited to help student's grow in their own faith and move forward living in accordance with the values of the Lord.
