

[Convert this to a PDF before submitting (1-page maximum, not including references). To use this template, please go to File → Download. You may include figures and tables. SB RAPIDD proposals can request one shift of beamtime. We suggest you talk with the Beamline Scientist if you are doing anything other than routine MX. Delete the text within brackets [] before converting this to a pdf. This template is for Structural Biology RAPIDD proposals only.]

Scientific question

[Describe the goal of your proposal. What scientific question are you asking?]

Experiment plan

[Provide information about your samples, e.g., quantity, size, quality. What kind of a beamline do you need for your experiments (e.g., tunable, SAXS, etc.) or, if you are requesting a specific beamline, why are you requesting this beamline? What do you expect to learn? For SAXS or XFMS experiments: be sure to include why you are requesting SAXS or XFMS specifically.]

Rapid readiness

[What is the status of your samples? Are they ready for experiments? If not, when will they be ready?]

References [does not count towards the 1-page limit]
