

Changelog:

v1.4.3 - August 22, 2025

Misc Changes

- You can now click R on the Pokémon summary screen to view IVs, if clicked again EVs are displayed, once more and normal stats are displayed again
- After using a rare candy you are no longer kicked back to the bag
- Reimplemented the Update compatibility man. This character will make your savefile from old versions pre 1.4, compatible with the current version. However the results might not be perfect and I'd still highly recommend playing 1.4 from the beginning to experience the whole reworked story.

Pokémon Changes

- Added Entei and Raikous new custom shinies
- Elekid, Electabuzz, Electivire, Magnemite, Magnetron, Magnezone and Jolteon now learn Volt Switch through TM
- Cyndaquil, Quilava and Thyphlosion now learn flash through TM
- Machoke and Machop now learn Drain Punch through TM

Move Changes

- Drill peck now has a higher chance to be a critical hit

Bug Fixes

- Evaluating your dex no longer freezes the game
- Initiating external communications (like the union room) no longer freezes the game
- The Battle Frontier no longer freezes the game!
- Kimono Girl Moozen no longer freezes the game
- The Ecruteak City and Mahogany town trades no longer disable each other
- Fixed a glitch where using shards to speed up Kurts ball crafting made the player receive no balls
- Pichu now has the correct custom shiny palettes in battle
- Fixed a visual glitch on shiny Meowth and Dialgas backsprites
- Shiny Shadow Lugia and Shiny Blaziken now use the correct overworld shiny sprite
- Slaking was mistakenly named Sklaking in some cases
- Fixed a smashable rock which had no interaction in Burnt Tower
- Corrected some typos and reworded parts of the secret lore entries in Rocket Hideout
- The Assembly Plaza rare item seller would sometimes tell players he was selling Protectors while he was actually selling Electrizers

v1.4.2 - April 10, 2025

Misc Changes

- Added a bug fix npc in Assembly Plaza specifically to reactivate the Charmander Route 36 event for those who encountered it in 1.4.0

Bug Fixes

- Fixed a glitch that caused held items to not work when playing on TwilightMenu

v1.4.1 - April 06, 2025

Pokémon Changes

- Ninetales can now learn Shadow Ball through TM
- Arcanine now gets the ability Rock Head instead of Flash Fire
- Arcanine now learns Head Smash at level 55
- Slowking now learns Recover instead of SwarmStrike

Bug Fixes

- Fixed a major glitch where for some people the game would always crash upon completing the pre Lugia battle in the Whirl Islands. To fix this the fight was moved to the previous room
- Fixed a bug where the Charmander gift wouldn't be available if you chose Totodile as your starter
- Fixed a glitch where the Kimono Girls would dance through walls during the Whirl Islands summoning cutscene
- Fixed a glitch where the player would be flung into the void if they healed at a Pokémon centre with a Pokérus infected Pokémon. This isn't an exaggeration lol.
- Quick fix to a bug that caused the game to freeze when Professor Oak evaluates your Pokédex
- Fixed a glitch that caused the game to crash on later versions of MelonDS when entering the bottom floor of Mt Mortar

v1.4.0 - March 29, 2025

- The aforementioned moves have been replaced with; Freezing Glare, Thunderous Kick, Fiery Wrath (These are the Galarian birds signature moves), Scald AND Volt Switch!
- Tailow and Swellow are now pure flying type

- Minor rebalancing for trainers

DeadSkullzJr:

- Made a few adjustments to the ROM image.

v1.1.0 - July 18, 2021

An AP patch is now included with each update and is separate from the ROM hack. The reason for this decision is because not all environments require an AP fix patch to run the game properly. Utilizing said patch will allow this ROM hack to run in environments such as TWiLightMenu for example. USE THE AP FIX PATCH ONLY WHEN IT'S NEEDED.

DracAndre:

- TMs can now be used infinitely
- Added a gauntlet of four champion trainers to Mt Silver, this can be turned off from the Mt Silver Pokémon Centre
