Subject: request for public inquiry into government security and ministerial accountability

Dear Prime Minister, I am formally writing to you to request that the Government of Canada establish a full public inquiry into recent failures surrounding the management of ministerial responsibility, the safeguarding of confidential information and the general conduct of the cabinet.

In recent weeks, Canadians have seen first hand the unauthorized dissemination of secure Ministerial information, confusion and mismanagement of Ministerial Orders and resignations leading to the erosion of trust with the public.

This pattern of behaviour undermines not only the reputation of the government and parliament of which we serve, but the trust the Canadian people placed in their institutions to serve them.

Accordingly I am calling for a public inquiry that would investigate the events that lead to the breakdown of communication and the eventual leaks themselves, assessing cabinet security protocols, providing mechanisms for accountability and transparency on the effectiveness of the government going forward.

It is my belief that an independent inquiry would be vital to restoring public trust, because Canadians deserve answers, I urge you to consider this request carefully.

I'll give you 48 hours to respond to the letter before it is made public to the press. If you do not the NDP shall table a motion before parliament and send a letter directly to the speaker of the house.

Yours sincerely
Oracle P.C, MP
Leader of the NDP
