UU Church of Bloomington

Five Levels of Covid-19 Response

Updated 8/11/2021

The Metrics committee of the NEST Working Group recommends the following five-level response, provided there are no unanticipated major changes in the pandemic situation (for example, the sudden rise of variants).

We strongly recommend full vaccination (including booster shots if necessary) for all members (including adolescents and children) who are able to be vaccinated.

Level	CovidActNow	Building Access
1	Very High (Red) or above	No Access Condition - No meetings in the church building
2	High (Orange)	Restricted Access Condition- groups of 5 or less who must be in the building to do their work. Their work cannot be accomplished outside of the church building.
3	Medium (Yellow)	Limited Access Condition - many small group meetings, no in-person worship. No food or drink. Group size maximum of 15.
4	Low (Green)	Near Full Access - as #3 but also in-person worship with masks.
5	No Covid-19 community spread in Monroe County and surrounding counties	Full Access Condition - return to normal (or new-normal) operations

The Metrics committee uses the following scientific information in its recommendations:

1) CovidActNow URL: https://covidactnow.org/us/indiana-in/county/monroe_county/?s=2040960

2) Current, national, state, and local (Monroe County) guidelines

This system is based on inclusion of all individuals (12+) regardless of vaccination status.

Based on Monroe County, but we reserve the right to modify if adjoining counties trend high.
