

Chromebook Distribution Model

For is school year we will be using the following model for district chromebooks

Elementary Schools

- Students will not have the option to bring their own devices. All students must use a district chromebook.
- K-4 - Students will not be taking devices home. Devices will remain in carts in the students classroom. No insurance will be needed for these students.
- 5-6 - Students will be taking devices home and be responsible for bringing them to school on a daily basis. Families have the option to obtain insurance to cover damage to devices. The cost of insurance per device is \$30.00 for the school year. The option to choose chromebook insurance will be available when you fill out the Annual Update Form.

Middle School

- Students will not have the option to bring their own devices. All students must use a district chromebook.
- Students will be taking devices home and be responsible for bringing them to school on a daily basis. Families have the option to obtain insurance to cover damage to devices. The cost of insurance per device is \$30.00 for the school year. The option to choose chromebook insurance will be available when you fill out the Annual Update Form.

High School

- Students will have the option to bring their own devices.
- If a student opts for a district device, they will be taking devices home and be responsible for bringing them to school on a daily basis. Families have the option to obtain insurance to cover damage to devices. The cost of insurance per device is \$30.00 for the school year. The option to choose chromebook insurance will be available when you fill out the Annual Update Form.
