Bring Your Own Device (BYOD) Windows Directions
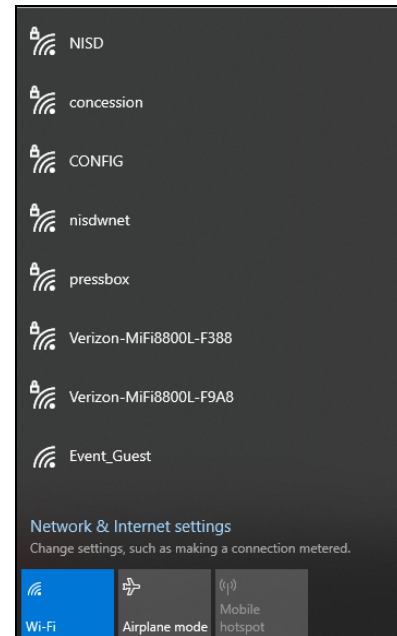

Connect to NISD wireless network

When prompted input your NISD network username and password.

After Signing In it will take you to a website to re-enter your credentials.   Click sign on and follow the instructions provided.

To install the certificate click on it and then click "OPEN" to start the procedure. When the box changes click
- "Install Certificate"
- "Current User"
- Place certificate in the following store:
  Trusted Root Certification Authorities
- "finish", click "OK" two times and then "Continue".

Extra Step if needed:
If it happens that your computer has been connected to another network where BYOD was also enabled or a network where certificate-based authentication was enabled, your computer may have more than one certificate already, Windows will ask to choose the correct one for NISD, make you select the one with NISD domain.
