## **-Where is Sa'chil-**

Sa'chil stands outside Reachwind Eyrie, looking over the cliff. She will be eating & drinking while standing, she will not sleep in any bed while in this state.

Is she not there? Wait a few hours, perhaps she saw an enemy and went after it.

Still not there? There is a debug-spell in your inventory.

Still not there? Make sure none of your other mods are messing with her placement & you have the plugin enabled.

## **-How to start Quests-**

Sa'chil has 5 quests. Here is how to start each of them

### **- Quest 1 -**

#### **The Khajiit Returns**

This one will start automatically after reaching relationship level 5 or higher.

Relationship not high enough? Ask Sa'chil about herself.

## - Quest 2 - Big Brother's Omen

This one starts when you:

- Complete Quest 1
- Complete Delphine's quest "A Blade in the Dark"
- Sa'chil told you about both her parents in "About you."

After Sa'chil tells you "Traveling with you is crazy", wait 5 days until the courier gives you a note.

### - Quest 3 - Wrath of Hammerfell

This one starts when you:

- Complete Quest 2

After Ke'tud leaves, wait a few days until all 3 of the ambushes are completed.

You will be attacked randomly, after the timer/cooldown for the enemy spawns has exhausted.

After that, wait a few days until the courier gives you a note.

**- Quest 4 -**  
**Mending of the Shattered Hearth**

This one starts when you:

- Complete Quest 3

After Sa'chil leaves for Hammerfell, wait for 3 weeks until she gets back.

Are the 3 weeks complete? Search for the courier!  
After reading the note, she should stand near the cliff at Reachwind Eyrie again.

## **- Quest 5 -**

### **Child of Aydith**

This one starts when you:

- Talk to Sa'chil while she sleeps (Random low chance)

After you wake Sa'chil up from a nightmare, she seems shocked. You go in her dream and fight her demons.

## **-All about Romance & Marriage-**

Sa'chil will show interest in you when:

- Told her where you're from in "About me"
- Complete Quest 4

After Sa'chil arrives back to Skyrim, she acts a little odd to you. What could it be? Ask her in the new "About us" section.

## -Relationship-

After accepting her interests, you two start growing your relationship.

Go on "dates" in an inn or your home, and chat with her.

After a while, she will ask you to go on a picnic. This gives a lot of romance levels when completed.

After reaching **romance level 50 or higher**, you can propose to her in "**About us**"

## **-Wedding-**

Wait a few days until Ke'tud & Tanan's letter arrives, and attend your wedding in Riften.

### **Say yes:**

After accepting marriage in Riften, Sa'chil will give you a gift & you two live happily ever after.

### **Say no:**

After rejecting marriage in Riften, Sa'chil leaves Skyrim forever. There's no going back.

## -Debug-

Sa'chil will possibly act strange sometimes. Follow these steps if she's being weird.

- Use the command "**ResetAI**" on her, have her selected.
- Use the command "**Disable**" on her, then "**Enable**", have her selected.
- Ask her to part ways, then come back to her **an hour** later, perhaps she was tired?
- Not working or a very specific issue? Feel free to report it in the bugs-tab.

## -Tips-

Want some tips? Here you go!

- Play with subtitles, Sa'chil has a rough accent and is hard to understand sometimes.
- Take her on your quests, maybe she has something to comment on, and it will strengthen your bond too!
- Take your time while talking, maybe you'll learn something fun! There's no rush!

## -Notes-

- Use the command "**coc ReachwindEyrieExterior01**" to teleport close to her.
- Use the command "**coc SachilDebug**" to teleport in the Debug room. The exit brings you a few meters away from Reachwind Eyrie.
- Sa'chil's brain goes haywire sometimes, that's because she has a lot to work with. Give her a few seconds to calm down before debugging.

## **-Updates-**

There is so much more I'd like to add after 1.0.1! Stay tuned for huge updates!

These include

- All of the guild's quest commentary.
- Countless of side-quest commentary.
- More basic things to say.
- A huge new quest with a new character.
- And so much more.

Thank you so much for checking out 1.0.3, I hope you'll enjoy her! Feel free to contact me if you have questions/feedback/bug-reports.

Best regards  
**Scarundy.**
