

## Assignment no 1

### Psy101

#### Answer:

Serial no.	Scenarios	Gestalt law (1)	Explanation (3)
1.	Ahmed thought that people who were talking to each other at the festival were groups of people.	Law of Proximity	According to the law of Proximity that it is human's perception to group the people or objects if they are near to each in time and space. In this scenario, Ahmad is having the same thinking that, He grouped the people in a group because they are talking to each other in time and space.
2.	The wildlife photographer saw blue birds with sharp feathers and black birds with furry appearance. He labelled them as two separate groups of birds.	Law of similarity	This scenario relates to the law of proximity because this law states that it is human perception to group people or objects together when they are close in time and space. And in our case, Ahmad thinks the same. People grouped together because they talk to each other.
3.	Sana saw some birds flying in a particular direction and she thought that they are a group and all going to their home nest together.	Law of Simplicity	People intimately prefer the simplest, most stable, straightforward, and introductory form of possible associations. An encouragement is organized into as good and simple a form as possible; 'good' refers to symmetrical, simple, and regular. And in our case Sara is having the perception about them and she considered them to be one group and allowed them to be moving to their nests.

4.	Amna was solving her geometry paper. She saw some lines that were disconnected. She was surprised to see that when she connected those lines, a circle or triangle would be formed.	Law of continuation/ law of continuity	We tend to cluster the stimuli into sleek and continuous patterns or elements. Human have a capability to continue contours whenever the weather of the pattern establishes associate degree silent direction. Same is Amna's case she continuing the lines in her mind and created the shapes.
5.	Salman viewed the clouds and main figures as he observed them along with the sky.	Figure and Ground	Our perceptual tendency to see other thing (objects) with the focus as well as the background the object is being honored with respect to tits background. black board and chalk( These will be bandied in the detail and in the section of perception).
