Abstract: Arial, Bold, 8pt

Insert your abstract text, about 250-300 words providing trial information under the following sections. **First**, background. Provide context or background for the study and state the study's primary objective or hypothesis in 1–2 sentences. Also, please explain the previous research/program what other people do or what you have done before. Author include hypothesis (if any) which explained the tentative of result. **Second**, methods. Describe the basic procedures used during the study, including selection of study subjects and observational and analytical methods. Define the primary outcomes that were measured for each group of subjects about implementation of community engagement. **Third**, results and discussion. Summarize the main findings, including specific effect sizes and their statistical significance, if possible. Include (if relevant) the number of participants in each group, the primary outcome for each group, and any significant adverse events or side effects. Also, please explain relation between your theory and your result in your program. **Fourth**, conclusion. In 1–2 sentences, state the principal conclusions, emphasizing new and important aspects of the study or observations in aspect of community engagement. Also, mention the recommendation from your manuscript related about community engagement.

Keywords

Type your keywords here; separated by semicolons; maximum of 5 keywords; Arial, 8pt;

Abstrak: Arial, Bold, 8pt

Masukkan teks abstrak Anda, sekitar 250-300 kata yang memberikan informasi singkat tentang isi artikel. Pertama, latar belakang. Berikan konteks atau latar belakang penelitian dan nyatakan tujuan utama penelitian atau hipotesis dalam 1-2 kalimat. Jelaskan juga penelitian/program pengabdian sebelumnya yang dilakukan orang lain atau yang telah Anda lakukan sebelumnya. Tulis juga hipotesis (jika ada) yang menjelaskan hasil sementara. Kedua, metode. Jelaskan prosedur dasar yang digunakan selama penelitian, termasuk pemilihan subjek penelitian dan metode observasi dan analisis. Jelaskan hasil utama yang diukur untuk setiap kelompok subjek tentang implementasi pelibatan masyarakat. Ketiga, hasil dan pembahasan. Rangkum temuan utama, termasuk ukuran efek spesifik dan signifikansi statistiknya, jika memungkinkan. Sertakan (jika relevan) jumlah peserta dalam setiap kelompok, hasil utama untuk setiap kelompok, dan dampak yang tidak diinginkan atau efek samping yang signifikan. Jelaskan juga hubungan antara teori dan hasil penelitian dalam program Anda. Keempat, kesimpulan. Dalam 1-2 kalimat, nyatakan kesimpulan utama, dengan menekankan aspek-aspek baru dan penting dari penelitian atau pengamatan dalam aspek keterlibatan masyarakat. Selain itu, sebutkan juga rekomendasi dari naskah Anda terkait keterlibatan masyarakat.

Kata Kunci

Ketikan kata kunci disini; dipisahkan oleh tanda titik koma; maksimal 5 kata; Arial, 8pt

1. Introduction: Arial, 11pt

Introduction section firstly highlighted the target population, explaining the context in which the target population takes shelter while discussing the facts or phenomena in the target population that are the reasons for implementing community empowerment activities. In strengthening the background of the study or activity, authors are required to add empirical backgrounds and conceptual frameworks/backgrounds that are constructed from reviews of relevant previous studies which are published no later than 5 years. Things that have been done by other parties to overcome the problem are therefore mentioned.

Theoretical background as the next part contains previous theories as the basis of research and the temporary hypothesis. This theory will be used to provide **state of the art** of your manuscript from research problems that have been proposed. In the context of community engagement, the theory that should be used primarily is the theory related to community engagement, community development, or community services. The last part, namely research objective and target of community empowerment activities, are related to expected social changes or community service goals.

2. Methods - Arial, Bold, 11pt

The method must clear with the location and time of the research, the population and sample of the research, the research variables and the research data. The method or strategy should be related to the research approach, for example: PAR (Participatory Action Research); ABCD (Asset Based Community Development); CBPR (Community-Based Participation Research); Service learning (SL); and or other Community Development Methods). It is necessary to also explicitly explain the form of participation and interaction with the communities in the community engagement program.

Describe the basic procedures used during the study, including selection of study subjects and observational and analytical methods. The method of your manuscript also mentions **detail of your community engagement program**. Define the primary outcomes that were measured for each group of subjects about implementation of community engagement.

In this section, Authors are required to justify the condition/situation before the programs/activities are implemented and the expected result which is depending on your field or the topic of community engagement program (program that has been done, experiment, impact of your program, survey, interview, questionnaire, etc.).

3. Result and Discussion - Arial, Bold, 11pt

Contains a description of the results of the community service process, namely an explanation of the dynamics of assistance process (a variety of carried out activities, forms of technical action or program action to solve community problems). It also explains the emergence of expected social changes, for example the emergence of new institutions, changes in behavior, the emergence of local leaders (local leaders), and the creation of new awareness towards social transformation, and so on.

In this section, Authors are required to emphasize the analysis of the condition before and after the programs/activities of community engagement are implemented. The analysis should be completed with a further discussion on the participation of the community as well as the impacts that are gained by the community. It will be good additional content if the Authors also include the adoption of innovation by the community.

Result and discussion of your manuscript also interconnected with your theory that used, included **novelty of your manuscript about community engagement**. Also, your manuscript is based on the result of your community engagement program and what is the implication of this community engagement program to community. **Minimum of your explanation on this chapter is range 40% to 50% of your manuscript.**

1.1. Tables - Arial, Italic, 11pt

All tables for submitting manuscript should be numbered with Arabic numerals and this tables can be edit and not as images. Every table should have a caption. Headings should be placed above tables, centered. Only horizontal lines should be used within a table, to distinguish the column headings from the body of the table, and immediately above and below the table. Tables must be embedded into the text and not supplied separately. If the table get on other sources, write the name of source below the table, left justified. Below is an example which the authors may find useful.

Table 1. An Example of Table - Arial, 10pt

An example of a column heading	Column A (t)	Column B (t)
And an entry	1	2
And another entry	3	4
And another entry	5	6

Source: An Example of Source (Year of Source) - Arial, 9pt

Your table on manuscript as much as possible in one page, not continued into next page. It is for the sake of ease for Reader that read your manuscript. Also, for mentioning your table, please mention your table with the number of your table. For example, "... the result of our research is mention on Table 4 ..."

And please not mention your table with this example, "... the result of our research is mention on Table below ..."

1.2. Figures Arial, Italic, 11pt

All figures should be numbered with Arabic numerals (1, 2, 3,). Every figure should have a caption. All photographs, schemas, graphs and diagrams are to be referred to as figures. Line drawings should be good quality scans or true electronic output. Low-quality scans are not acceptable. Figures must be embedded into the text and not supplied separately. In MS word input the figures must be properly coded. Lettering and symbols should be clearly defined either in the caption or in a legend provided as part of the figure. Figures should be placed at the top or bottom of a page wherever possible, as close as possible to the first reference to them in the paper.

The figure number and caption should be typed below the illustration in 11pt and centered. If the figures get on other sources, write the name of source below the figures, left justified. The figures on your manuscript must send separately from your manuscript with high resolution. Below is an example which the authors may find useful.

Figure 1. (a) first picture - Arial, 10pt

Source: An Example of Source (Year of Source) - Arial, 9pt

4. Conclusion - Arial, Bold, 11pt

Conclusion of your manuscript is defined what is novelty of your manuscript to knowledge and to fruitfulness of your **community engagement program, benefit for society or community** and **contribution theoretic** from your manuscript. Also, mention the

recommendation from your manuscript related about community engagement. This conclusion is **maximum 2 paragraph**.

Acknowledgements - Arial, Bold, 11pt

Acknowledgements on this manuscript at the end of the manuscript before the references and do not, therefore, include them on the title page or otherwise. List on this tab those individuals or company that provided help during your research. The example of providing your research, e.g., providing language help, writing assistance, data collect, proof reading the article, etc.

Authors' Information

Kindly compose brief biographies for each author, detailing their current institutional positions, qualifications, and relevant background information in no more than 150 words each. If available, please provide the email addresses of the authors and their ORCID identifiers. Please refrain from including any information regarding competing interests in this section.

References - Arial, Bold, 11pt

References of your manuscript must be up to date (in the last of 5 to 10 years and **minimum of 20 references that 25% of the references is from primary sources/journal**) and your reference can be accessed by anyone.

Format of the references for submitting manuscript on this journal with style of APA, which can be done in MS Word. Reference of your manuscript is organized alphabetically. Meanwhile, references should be in APA style constructed with **Mendeley**. For more information, please check <https://open.mendeley.com/use-citation-style/apa>. Here are example references format with style of APA.
