

Photo slideshow with music

2022

Using the application does not require any kind of registration or entry of any personal data.

The application with all its functions runs locally on your device. The developer does not collect or share any data that you have entered using the application (for example, images, texts, fonts and so on).

Privacy policy

Non-personalized information

Developers of the application "Photo slideshow with music" (hereinafter referred to as the application) collect from your devices only non-personal statistical data about the application, such as application failure reasons (failure log), device operational system version, mobile device model, type and brand, version of our application installed on your device, source of application installation, application launch time, language, device screen resolution, your gender, age group (without determining exact age), device Anonymized IP address to determine your country and city (without getting exact coordinates), GPU core, storage size, timezone, etc.

The application collects only performance statistics, such as the time a user spent on various screens; the most popular user transitions; the most popular user stickers in the application. All data are presented in statistical form.

The data are non-personalized and are used by developers only to improve the application and fix bugs. Your country and city are determined only to help developers comply with laws and regulations of the country where you are staying.

To collect and store the data the developer uses reliable services such as Google Analytics и Firebase. To learn more about the privacy policy of these services go to [Privacy Policy – Privacy & Terms – Google](#).

Personalized information

When the application is running, developers collect some personal data from your devices such as Advertising ID , IP address, App-instance ID, device ID, etc.

The data collection is used to personalize the advertisement you see. Based on the obtained data advertiser networks will select and show the most relevant advertising.

Purchases and subscriptions in the application with parameters, including the product ID, name and price; data required for in-app purchases. Google Play privacy policy <https://policies.google.com/privacy?hl=en>

The data affecting user personalized advertising are shared only with advertiser networks connected to the application. We work only with advertiser networks that ensure proper processing, protection and privacy of the collected data in accordance with their policies. Personal data from your devices are shared only with advertiser networks connected to our application for ads personalization purposes. Developers do not process, post and share your personal data with anyone else excluding the listed advertiser networks. Links to advertiser networks privacy policies:

BIGO Ads Privacy Policy

<https://adsbigo.com/privacy.html>

Since May 25, 2018 we ask residents of the European Economic Area to give us consent to personal data processing. If you deny such consent, instead of the interest-based advertising you will see the advertising discarding your personal data.

If you live in the European Economic Area, you can change your consent to the personal data processing in the application settings menu.

Information security

We take care of the security and confidentiality of your information. We use administrative, physical and electronic measures designed to protect your information from unauthorized access and use.

Android Privacy Permissions Requested by This Application

EXTERNAL STORAGE

The application requires this permission to access and load images, music files from the internal and external storage on your device. All data (images, music, texts, etc.) loaded to the application are only processed on your device. We do not send the data from your device anywhere else.

CAMERA

This permission is used to access the camera. The permission allows the application to collect user photos taken with the device camera and use it to generate content in the application (slide shows). All images are processed only on your device.

MICROPHONE

We use this permission only to record your voice (environmental sounds) for content generation within the application. If you don't want to record your voice (environmental sounds), you can deny the permission. It will not affect the application's performance. All audio content is recorded by and stored exclusively on the recording device. We do not share your recordings with the external sources and do not use remote servers to store your recordings.
