

PC2A for HR4585 the Save Net Neutrality Act

EXPLANATION: Days before the Federal Communications Commission (FCC) will vote on its proposed rollback of Net Neutrality rules that protect the open internet, Representative Sean Patrick Maloney (NY-18) has introduced the Save Net Neutrality Act (HR4585) to stop the FCC's Notice of Proposed Rulemaking (NPRM) that would result in a final rule eliminating the existing Net Neutrality policy.

"The FCC's proposal to screw up your internet is just about the worst plan I've seen – the comment period was a mess and the rest of the proposal is full of holes. My bill would stop this rule from going into effect and keep the internet the way it is – affordable, open, and full of innovation." –Rep Sean Patrick Maloney

HR4585

"To prohibit the Federal Communications Commission from relying on the Notice of Proposed Rulemaking in the matter of restoring internet freedom to adopt, amend, revoke, or otherwise modify any rule of the Commission."

Referred to the House Committee on Energy and Commerce.
