B. Establishing a purpose of the new lesson				Conduct a review on finding the perimeter of a triangle, square, rectangle, parallelogram, and trapezoid	
C. Presenting Examples/ instances of the new lesson	Let pupils add or multiply the following numbers mentally. 5 + 5 4 x 10 12 + 24 5 x 20	Let pupils add or multiply the following numbers mentally. 5 + 5 4 x 10 12 + 24 5 x 20	Ask what unit of measurement and measuring tool is appropriate for the following: -distance between building -edge of a table -sides of a handkerchief - length of a safety pin	Present the problems on TG p. 249. Read and analyze the problems.	

D. Discussing new concepts and practicing new skills no.1.	Ask what unit of measurement and measuring tool is appropriate for the following. Distance between buildings Sides of a handkerchief Length of a ball pen Sides of a blackboard	Ask what unit of measurement and measuring tool is appropriate for the following. Distance between buildings Sides of a handkerchief Length of a ball pen Sides of a blackboard	Present the objects for the pupils to observe: A handkerchief the blackboard The reading table a neckerchief	Group the pupils into five or six groups. Let the group work together to find the answers to the given problems. Discuss their answers.
E. Discussing new concepts and practicing new skills no.2	Show a plain handkerchief. Ask: What is the shape of this handkerchief? Do you carry your handkerchief everyday? Why? What are the uses of a handkerchief?	Show a plain handkerchief. Ask: What is the shape of this handkerchief? Do you carry your handkerchief everyday? Why? What are the uses of a handkerchief?	Group the pupils into six groups. Assign different objects to each group. Let the pupils work together to find the answers to the given activity following the guide questions on TG p. 244. Let the different groups display their output and ask them to discuss their answers.	After all the groups have presented, let the pupils realize that they can use different strategies to solve problems involving perimeter.
F. Developing Mastery (Leads to Formative Assessment 3.)	Let the pupils observe the following objects: a. A handkerchief b. A picture frame c. The reading table d. The blackboard e. The sides of the room	Let the pupils observe the following objects: f. A handkerchief g. A picture frame h. The reading table i. The blackboard j. The sides of the room	Discuss Explore and Discover on LM p. 185. Give the following activity.	Lead the pupils to understand more about solving routine and nonroutine problems by doing Explore and Discover on LM p. 188.
G. Finding practical application of concepts and skills in daily living	Conduct the <i>Performing the Activity</i> on TG page 244.	Conduct the <i>Performing the Activity</i> on TG page 244.	Work on Get Moving and for more practice, do Keep Moving on LM p. 186. Check the pupils' answers.	Work on Get Moving on LM p. 189. Check their answers. For more practice, answer Keep Moving on LM p. 190. Call some pupils to show their answers on the board.
H. Making Generalization and abstraction about the lesson	Let pupils do the activity under <i>Processing the Activity</i> on TG page 245.	Let pupils do the activity under <i>Processing the Activity</i> on TG page 245.	Lead the pupils in giving the generalizations by asking what is perimeter, How do they find the perimeter of a given figure, and the formula in getting the perimeter of a plane figure. Let the pupils solve the problems on Apply Your Skills on LM p. 246.	To derive at the generalization, ask: How do we solve word problems involving perimeter of closed plane figure. Let the pupils solve the problems under Apply Your skills o LM p. 191. Original File Submitted and Formatted by DepEd Club Member - visit depedclub.com for more
