

Creating a QR Code to Collect Donations

Step 1:

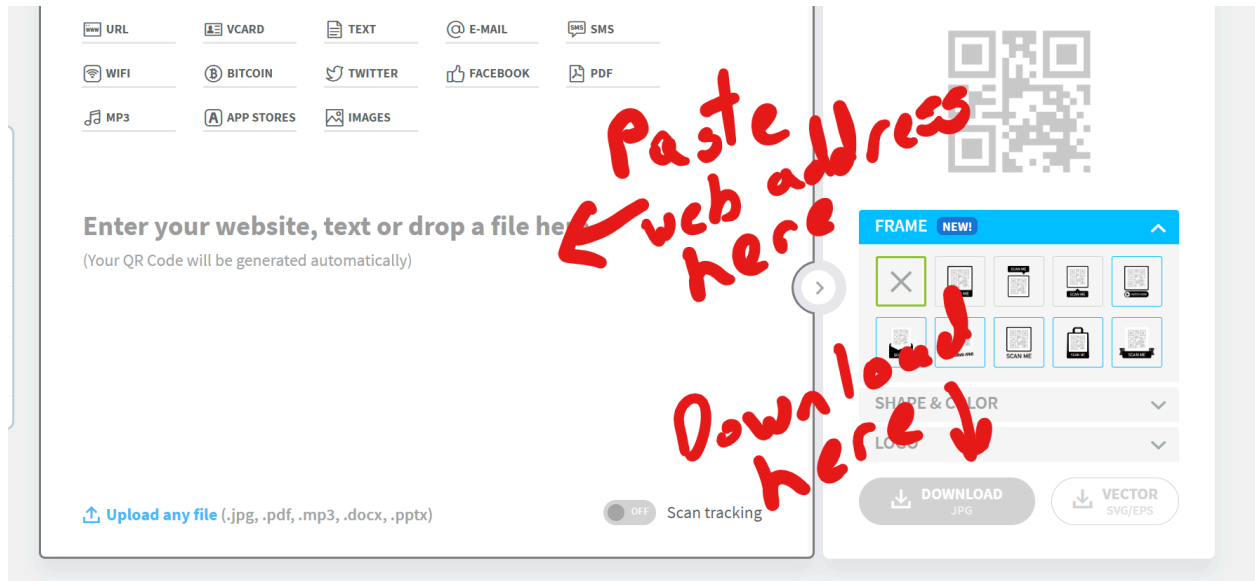

Navigate to your personal fundraising page (make sure you're on your personal page and not the page for the event).

Step 2:

If using Google Chrome, left click on the arrow on the right side of the address bar, choose "Create QR Code" and download the code.

If using another browser, copy the web address for your individual fundraising page, open another browser window and navigate to [this site](#). Paste the web address into the box. Click "Download." A window will open for you to save the code.

Step 3:

Insert your downloaded QR code into a copy of [this page](#) (or make your own) and personalize it where needed. Then just print it out or email it to people and start fundraising!
