

Dear Vice President Aw, Director Calhoun, and Director Freeman,

On behalf of the Residential Assistants and Desk Receptionists of American University with support of the American University student community, we request that mandatory COVID-19 testing be implemented at American University for all students, regardless of vaccination status, at least on a biweekly basis. We also request that information on COVID-19 infection rates and outbreaks in residence halls be communicated as soon as possible and posted weekly for public access. Residents and their residential staff have the right to know about the threat of COVID-19 that lurks in their home. Simply having the present mask mandate in place is not enough as full enforcement is impossible. HRL student staff have been tasked with ensuring that residents comply with this mask mandate, but we cannot be everywhere at once. Additionally, because of the influx of incident reports documenting mask mandate noncompliance, we ask that a separate form or reporting service be established to both make it easier to submit these complaints and to help reduce the heavy load these new reports place on the present IRF system.

We deserve transparency about COVID-19 infections on our campus as this virus has the potential to impact our safety and health as the frontline enforcers of American University's policy. We are putting our lives at risk for this University and our fellow students, and it is time for the University to play a greater role in keeping us and the overall AU community safe.

Sincerely,

Centennial Hall Residential Assistants:

Josh Hall

Abigail Stuckrath
