Abstract

Anomaly O-101 was founded on August 22, 1999, as a part of Anomaly series. This anomaly has the goal of eradicating humanity and controlling the surrounding area. It is noted that they has the ability to play faces in their roles as if they were human. Their true face can only be seen if someone sees an oddity in the untidy part of the mask, be careful if your suspicious movements are known by this entity. This anomaly really doesn't like their true self being seen in the eyes of other people, this will have an impact on the massacre of the victim. This anomaly attack was clearly visible on August 2024 and disturbed some local residents. Several people took part in the action to handle this anomaly, including security forces who immediately handled this case.

Keywords: *Anomaly O-101*

INTRODUCTION

An anomaly refers to something that deviates from what is standard, normal, or expected. In various fields such as science, statistics, and technology, anomalies are often considered irregularities that stand out from the usual patterns. For example, in data analysis, an anomaly might be an outlier— a data point significantly different from the rest of the data. These deviations can be important to identify as they may indicate errors, rare events, or something new and noteworthy that requires further investigation. These anomalies can manifest in various forms—such as bizarre phenomena, twisted realities, or entities that defy the laws of nature. Sigemah banghetu (1999) have said that anomaly is a dangerous creature and detrimental to many parties.

Anomaly series is a a development and research project regarding anomalous thought patterns carried out under the supervision of the state security agency with a regulatory code “[SSM/04/30/99]” which has been in effect since April 1999. This project has had 6 types of anomalies in its research, in mid-August 2024 an anomaly with the anomaly code O-101 escaped from the research laboratory. The disappearance of this anomaly caused panic among all local residents. Several TV show reporters and the masses recorded several blurry O-101 anomaly sightings. Rizzky lehlah (2024) have said their appearance changes, they imitates people they accidentally meets when they passes with u. Public is encouraged to use masks so it hard to imitates ur face. Due to the release of this anomaly from the supervision of local security forces, residents agreed to demonstrate in front

of the anomaly research building as a form of disappointment.

ANOMALY O-101

The O-101 anomaly is an anomaly discovered by combining anomalies No. 2 and 5. This anomaly has the ability to imitate the appearance, voice, and characteristics of someone who has been the victim. This anomaly has an original gray appearance with an elongated, imperfect face. Having a height of up to 2 meters, this anomaly can change its body size like clay. The O-101 anomaly has 3x more teeth than normal humans. has the characteristics of not being able to socialize like humans and having strange behavior patterns every time the sun goes down. Anjayana paghit add comment about the anomaly code O-101 wants to get too much attention from the people they meets, they can easily kill the person if they doesn't feel satisfied. Ngeteh ashu (2024) have said that This anomaly is unable to feel feelings like humans. This is the several cases anomaly code O-101 did:

N o.	Contra	Victim	Date
1.	Error research	10 scientist died	August, 1999
2.	Escaping Lab.	50 security died	August, 2024
3.	Brutally Killing Mass	365 mass died	August, 2024
4.	1000 Mimmic Face	219 mass face get stolen	August, 2024

This case is getting worse day by day because the security forces find it difficult to distinguish who the enemy is in the sheep mask. This is in accordance with the statement from caphe shial (2023) that The destruction of this country has been caused by unknown entities that have been developed with knowledge-based lures that ultimately harm local residents. This statement is also supported by several prominent important people such as Juan Choke, Ashwu

Tennant, and several other figures. They expressed their disappointment with the decision of researchers and security officers who were less prepared to provide enthusiasm if an error occurred in a research project. Some of them are suing to have this anomalous series project removed so that in the future problems that are difficult to handle like the current situation do not happen again.

Picture 1. The Mandela catalogue from Alex K. (2021)

Anomaly code O-101 real name was ??????????????????. This is stated in the documents in the laboratory when it is being investigated. this anomaly ?????? has committed many crimes while he was still in human form. this fact surprises everyone ??????????. then there are various types of tape recordings regarding interviews with ?????????????? Which ???? Then ????
