Java\Java+React developer

We, **Interexy** , specialize in mobile application development for tech startups and established enterprises in the US and Western Europe. Our projects are not tied to one area, so we can work with cool products in Fintech, Game, Health, Social Media, Blockchain etc.

We are looking for an experienced **Java\Java + React developer (Middle+/Senior)** who will be responsible for developing and maintaining our web application.

What is important to us:

- Java experience: At least 3 years of experience in Java development. Deep understanding of the language, including core concepts, packages, data types, and API usage is preferred.

- React experience: Desirable experience working with React and its ecosystem, including React Router, Redux, or MobX for state management.

- Web development: Skills in web development, including HTML, CSS, JavaScript, and other frontend technologies. Experience with modern frameworks and libraries such as Angular, Vue.js, or others is preferred.

- Databases: Knowledge and experience working with databases such as MySQL, PostgreSQL, or other popular relational databases, as well as experience with ORM frameworks like Hibernate or JPA.

- Server-side development: Experience with server-side technologies such as Servlets, JSP, Spring Framework, or other Java frameworks.

- RESTful API: Experience with developing and consuming RESTful APIs for server interaction.

- Tools and technologies: Knowledge and experience with development tools and technologies such as Git, Maven or Gradle, JUnit, or other testing frameworks.

- Analytical skills and problem-solving ability: Ability to analyze problems and find effective solutions. Proficiency in debugging and maintaining code.
