

Monte Vista Christian School
The Learning Center
 2026-2027

The Monte Vista Christian School Learning Center is for learners seeking additional assistance to their standard school program, providing learners with skills, support, tutoring, and academic accommodations* to assist them in reaching their highest academic potential.

This new Learning Center at Monte Vista Christian is offering individualized academic support and targeted skill development as part of a specialized, enhanced program. As this is an enhanced program beyond standard tuition, an additional fee will apply (*with financial assistance available for families who qualify through our financial aid process*). Learners can choose to take advantage of the Learning Center by enrolling in the **Basic Program** or the **Academic Lab** course. Learners who enroll in either program will have access to qualified teachers who can support both their content-specific work as well as assist with self-management, skill development, course management, and, when appropriate, specific academic accommodation* needs through one-on-one and small group learning sessions. Speak to your learner's Guidance Counselor for more information. *Middle School learners must meet eligibility requirements based on their academic progress and recommendation to enroll in the MS Academic Lab.*
