Welcome,

AKI: AfroCom Open-Source AI Initiative

Purpose

Harnessing Collective Intelligence and Artificial Intelligence for **User-Centric Experience (well-being)**, **Collaborative Problem-Solving,** and **Community Development** within the global Afro-community through **AfroCom Super-app Platform.**

AfroCom Super-app provides AKI with collective intelligence through user activities from the platform. The new AfroCom App to integrate AKI will be open-source software and can be found here

AKI Content

Objectives and Scope

The objectives and scope of the open-source AI initiative, outlining the specific AI-driven features and functionalities

- Objective & Scope

Endpoints: Data Source & AI application

AfroCom platform is the main source of data to train AI and the main endpoint of AI usage

- AfroCom Data State

Collaborative Tools

Our GitHub for version control, issue tracking, and code reviews to facilitate collaborative development among contributors

- Github Repository

Communication Channels: for real-time collective discussions, communication, collaboration, and documentation among project contributors and users.

- Google Doc
- Join in Slack
- Discord
- LinkedIn

AfroCom OSS Architect Overview

We have two OSS projects both closely interwind and dependent on each other
