

[Rosa \(#13872\)](#)

Rosa stumbled into the area known as Goldsea from an unknown place along with her mate [Aurora](#). Together they took on the task of being welcomed into the Goldsea pack and together they both started a pack of their own.

Rosa originally was mostly Elderberry colour but she stumbled upon a Merle top making that Elderberry less noticeable and bringing out the Begonia colour of her fur. She also found a Merle accent changing her accent to a type of spotted look. She still wants to find a Volmyr breed change for herself but also wants to wait to see if she would rather be a Direwolf.

Rosa doesn't remember who her parents or in-laws are, it's like her memory was erased when coming to Loria. She does have a best friend in Goldsea though in [Ocean](#) and her mate [Sandy](#). She's also best friends with [Red](#) from Darkspine. So much so that she sometimes lets her pups go to both of these other packs. She and Aurora currently have 27 pups together, 7 of which are still in the pack. Her favourite child is one of her first born pups [Brawl](#) he does the fishing for the pack taking over from his father.
