

Privacy Policy for SheetDrop

Effective Date: August 1, 2026

1. Overview

SheetDrop ("we," "our," or "the Extension") is committed to protecting your privacy. This Privacy Policy explains how SheetDrop handles user data when you use our Chrome Extension to capture and organize web snippets into Google Sheets.

2. Information We Handle

SheetDrop is designed with a privacy-first architecture. We do not collect, store, or sell personal information on secondary external servers.

- **Google Account Data:** SheetDrop authenticates directly with Google via OAuth 2.0 ([chrome.identity](#)) to securely connect to your Google Account. We do not see or store your Google password or credentials.
- **Clipped Content:** When you initiate a clip action, SheetDrop processes only the text snippet you highlighted, the active webpage title, URL, and a timestamp.
- **Target Spreadsheet Data:** SheetDrop reads the titles and IDs of your Google Sheets strictly to populate your sheet selection dropdown, and appends rows only to the spreadsheet you explicitly select.

3. How We Use Google Sheets API Data

SheetDrop requests access to Google Drive and Google Sheets APIs solely to provide core user-facing functionality:

- <https://www.googleapis.com/auth/spreadsheets>: Used strictly to read spreadsheet titles/IDs and append clipped row data (Timestamp, Text Snippet, Webpage Title, URL) into your chosen Google Sheet.
- <https://www.googleapis.com/auth/drive.file>: Used strictly to allow SheetDrop to create new "SheetDrop Clips" spreadsheets on your behalf inside your personal Google Drive.

4. Google API Services User Data Policy (Limited Use)

SheetDrop's use and transfer to any other app of information received from Google APIs will adhere to the [Google API Services User Data Policy](#), including the Limited Use requirements:

1. **User-Facing Purpose Only:** Data retrieved via Google APIs is used exclusively to provide and improve user-facing features (clipping text into Google Sheets).
2. **No Advertising or Surveillance:** Google API data is **never** used for serving advertisements, retargeting, profiling, or market research.
3. **No Third-Party Sharing:** We do not sell, rent, or transfer your Google API data to any third parties.
4. **No Human Reading:** No human reads your clipped text or spreadsheet data unless you explicitly give consent for technical support or as required by law.

5. Third-Party Services & Payments

- **ExtensionPay & Stripe:** For SheetDrop Pro subscriptions (\$2.99), payment processing is handled securely through ExtensionPay and Stripe. SheetDrop never receives or stores your credit card or financial details.

6. Data Retention & Revoking Access

- **Local Storage:** Your selected Spreadsheet ID, sheet preferences, and local clip counter are stored locally inside your browser (`chrome.storage.local`).
- **Deleting Data:** Uninstalling SheetDrop or clearing your browser data permanently deletes all stored local settings.
- **Revoking Access:** You can revoke SheetDrop's permission to access your Google Account at any time via your [Google Account Security Settings](#).

7. Contact Us

If you have any questions or feedback regarding this Privacy Policy or SheetDrop's privacy practices, please contact us through our developer listing on the Chrome Web Store.
