

GEANT Community Programme

infoshare outline

Date and time: Wednesday, 26 May 2021 14:00-15:30 CEST

Intro text for invitations and events.geant.org :

During our General Assembly meetings we always struggle to find enough time to cover and discuss all the important activities we perform in our GÉANT community, so with this infoshare we provide a dedicated time slot to give you a good introduction and overview of the GÉANT Community Programme, share with you the currently covered thematic areas, some examples of the success stories originated from the community programme and how you can propose and create your own topic to become one of the activities and of course to get your feedback to steer better our direction. And also to find out more about which area your organisation is very active in the programme.

The GÉANT Community Programme is a grassroots, voluntary initiative built by world experts from NRENs, user organisations, research institutions, commercial and industrial sectors. It provides an effective framework for forums to share information and best practices and to discuss possible innovations and further development of services.

The GÉANT Community Programme is made up of Task Forces (TFs), Special Interest Groups (SIGs), bespoke workshops and trainings, and collaborative projects and services designed to facilitate collaboration and the sharing of experiences between GÉANT, NRENs, other R&E bodies and members of the community. The GÉANT Community Programme guides the future development of R&E services, technology and also a variety of non-technical topics for the GÉANT community.

Time	Topic	Presenter / host	Messages
14:00 - 14:10 ('10)	Welcome, connectivity, infoshares	Gyongyi Horvath
