stainless steel rate in india

The **stainless steel** market in India is full of different grades. Each one comes with its special features and uses. You can find well-known types like **304 stainless steel** and **316 stainless steel**. But there are also less common ones such as **Jt, Sd, Dd, 410, 430, 409, 441, J3, J4, and 204cu**. The cost of these materials changes, depending on many things.

This article looks at the latest prices for these **stainless steel** types. It aims to give a clear picture of the Indian **stainless steel** market. Manufacturers, building pros, or anyone making a purchase will find this useful. It helps to understand how the prices for **stainless steel** in India work.

Key Takeaways

- The Indian **stainless steel** market has lots of grades, each with its own use and features.
- Prices for **304 stainless steel** and **316 stainless steel** can change a lot. **304 stainless steel** might cost between ₹180 to ₹200 a kilogram. **316 stainless steel** could cost between ₹210 to ₹290 a kilogram.
- The less known **stainless steel** grades also have different prices. These prices depend on things like the material's quality, size, and how it looks.
- Prices can also change depending on where you are in India. Things like storage costs and taxes in different states can affect the price.
- Global market conditions, the manufacturer, and industry trends all impact the **stainless steel** sheet and pipe market in India.

Stainless Steel Rate in India for Popular Grades

The **stainless steel** market in India is filled with choices. It has many popular grades, like **Type 304** and **Type 316L**.

Jindal Stainless Steel Sheets: Price List

Jindal is a top name in making **stainless steel** in India. Their range includes many types of **stainless steel** sheets. The **stainless steel 304 price** might vary from ₹203 to ₹215 per kilogram, depending on where you are in India.

Stainless Steel Grade	Price Range (₹/Kg)
SS 304	₹203 - ₹215
SS 316L	₹240 - ₹260
SS 310/S	₹195 - ₹210
SS 347H	₹260 - ₹280
SS 410	₹355 - ₹375

For stainless steel 304, prices for pipes are quite stable. They stay around ₹195 to ₹248 per kilogram for various sizes. You can get these pipes in sizes from 3mm to 609.6mm outside diameter.

Looking at the **Stainless Steel 304 Sch-10S Pipe Price List**, most prices are near ₹215 per kilogram. The weight per meter can vary a lot, from 0.28 Kg to 94.45 Kg. The **Stainless Steel 304 Sch-40S Pipe Price List** shows similar prices, about ₹215 per kilogram, with different weights per meter.

India's stainless steel market meets the needs of many fields. This includes Chemical Research, Petroleum and Gas, Agriculture Engineering, and more. The products are available in cities like Delhi, Mumbai, and several others.

Exploring Rates of Lesser-Known Stainless Steel Grades

Grade 304 and **Grade 316** are well-known in the **stainless steel** world. But India's market has many other grades with special uses. These lesser known types help meet different industry needs.

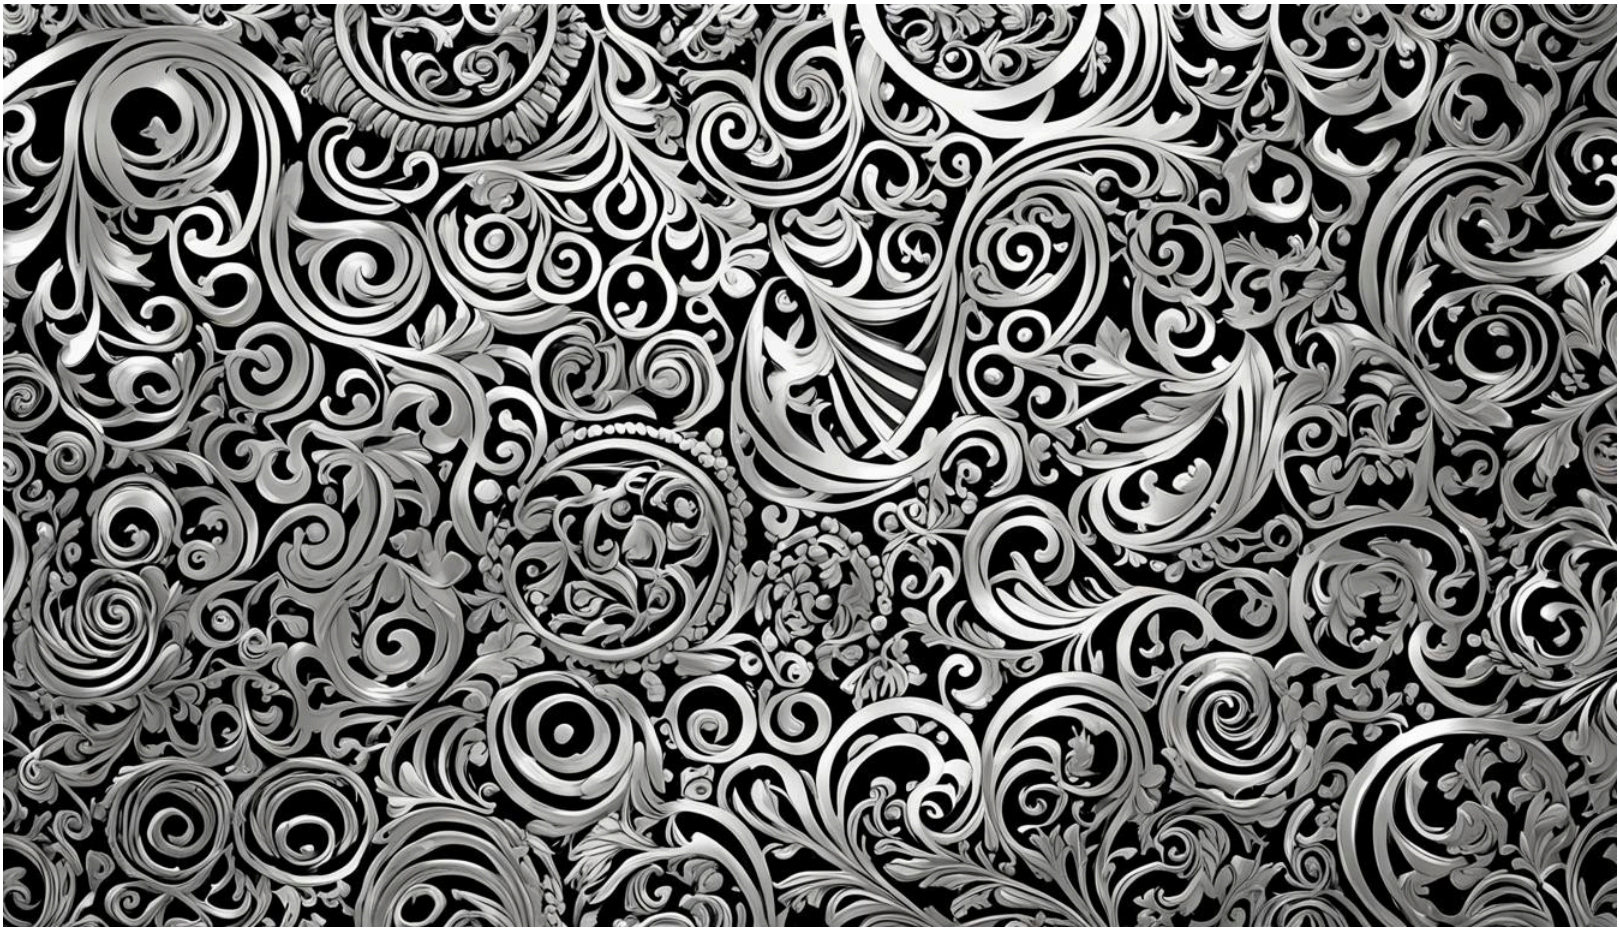

Stainless Steel 410 is famous for stopping corrosion and being very strong. It's used a lot where items need to resist heat and rust. For example, it's great for making knives, pots, and industrial machines. India's current price is about **Rs 355 per kilogram** for this type.

Then there's **Stainless Steel 430**, known for being easy to shape and having a nice surface. It's often used for making kitchen sinks, home appliances, and stylish building parts. In India, it costs around **Rs 295 per kilogram**.

If you need something special, **Stainless Steel 441** might be what you're looking for. This type is great for welding and is perfect for making car exhausts and other hot items. In India, it's priced at about **Rs 315 per kilogram**.

Stainless Steel Grade	Price per Kilogram (INR)
Stainless Steel **410**	355
Stainless Steel **430**	295
Stainless Steel **441**	315

Finding out about these not-so-famous **stainless steel** types is great for buyers and experts. They can get just the right material for their needs and sometimes save money. Knowing about these types gives businesses a smart edge in the **stainless steel** world.

"Stainless steel grades like **410**, **430**, and **441** offer unique benefits that can be tailored to specific industry requirements, often at more affordable prices than their more popular counterparts."

Conclusion

In India, the **stainless steel market** is vast and includes many grades. Each grade brings something unique to the table. For example, **Grade 304** and **Grade 316** are very popular for their ability to resist rust and last a long time. They offer a shiny

look too.

India also produces grades like **JT, SD, DD, 410, 430, 409, 441 J3, and J4**. These are not as well-known but have their own uses and costs. By looking at all the options, buyers can pick what fits their needs and budgets.

In the end, the **stainless steel industry in India** is lively and full of variety. It meets the needs of both local and international markets well. Whether needing a common **Grade 304** or something special, the industry's focus on quality and new ideas means there's a perfect stainless steel for every buyer.
