RE: Protest Letter Against Oncor & LCRA Bell County East to Big Hill 765kV Transmission Project (Docket 59475)

Dear Chairman Gleeson and Commissioners,

Thank you for your service to our state and for your continued commitment to protecting Texas communities from irresponsible infrastructure projects.

I am writing today to express my **protest** against the Bell County East to Big Hill 765kV transmission project proposed by Oncor and LCRA.

As a resident of Texas, I can confirm that this project **does not fit our community values**. The proposed area has intentionally pursued measured, deliberate growth, prioritizing rural character, land stewardship, and community over rapid or infrastructure-driven expansion.

And while it brings no benefit to our area, it also poses serious risks, and I would like to highlight several specific concerns:

- Ruination of the scenic and historic Texas landscape, which is an irreplaceable part of our state's identity.
- Proximity to homes, raising safety, health, and quality-of-life concerns for families who have built their lives here.
- Destruction of historic ranches, archaeological sites, and valuable cultural resources that help define the legacy of our region.
- Economic impacts, including decreased property values, reduced county tax revenue, and increased costs from road degradation during construction.
- Safety concerns, including increased wildfire risk and the loss of safe airspace needed for EMS helicopter access during emergencies.

Given the magnitude of these concerns, and the overwhelming **lack of public support**, I respectfully request that you **deny** the CCN amendment application for this project.

Thank you again for your time and dedication to our state. I appreciate your consideration on this urgent matter.

Sincerely,
