

### Clandonald Timeline

(Amanda scribed digital copy from sample form - NOTE that it appears teacher misunderstood what is required in timeline)

<b>Environmental Impacts:</b>	<b>Date(s):</b>	<b>Description &amp; Sources:</b>
Dead branch in crown	May 20, 2020	There is a large dead branch in the crown of the tree. Rot can be observed, as well as the work of insects and woodpeckers.
Bore holes	May 20, 2020	Also observed small drill holes in the trunk of the tree; obviously the work of some woodpeckers.
<b>Human Impacts:</b>	<b>Date(s):</b>	<b>Description &amp; Sources:</b>
Broken and sawed off branches.	May 20, 2020	With the tree's proximity to the parking lot, it is not surprising that some branches have been sawed off. As well, you can see where branches have been broken off.
Carving in trunk	May 20, 2020	Unfortunately, someone has had the urge to carve words into the trunk of this tree.
