

Dear teachers,

I just wanted to share how I use the [Noto Sans Gurmukhi font](#) on my computer (scroll down to see steps and screenshots). Some of your students may have been able to download and install the font through the link on the Dhahan Prize [Youth Award website](#), but they may **also need to add the Punjabi keyboard to their computers.**

Please let us know if you have any questions and/or any feedback to share. It's been a few years since we have been trying to implement this font requirement and we understand that there can be technical difficulties and challenges. We are available to work with you in guiding students through the submission process.

Thank you!

Munveer

-----

Here are the steps along with screenshots. Please note that this has worked on my computer as well as my mom, Harinder's, computer. However, everyone's device may have different settings.

1. Open 'Settings' on your computer and search 'keyboard,' then click on 'Edit language and keyboard options.'
2. Next, click 'Add a language.'

3. Enter 'Punjabi' in the search bar and select the Punjabi (Gurmukhi) option.
4. Make sure 'Language pack' is selected and click 'Install.'
5. After it has been downloaded, you can click 'ENG' (English) usually found on the bottom left of your homescreen, and you should see the Punjabi keyboard option.
