

Proposal: Ongoing maintenance costs of [Guide to Polkadot-JS](#) for September 2022 – February 2023

Proponent: [1ZUG7957Gfidjgm6sg4EZfFtKpJLXSWDRY7o5d1JGKJLoMM](#)

Date: 29.08.2022

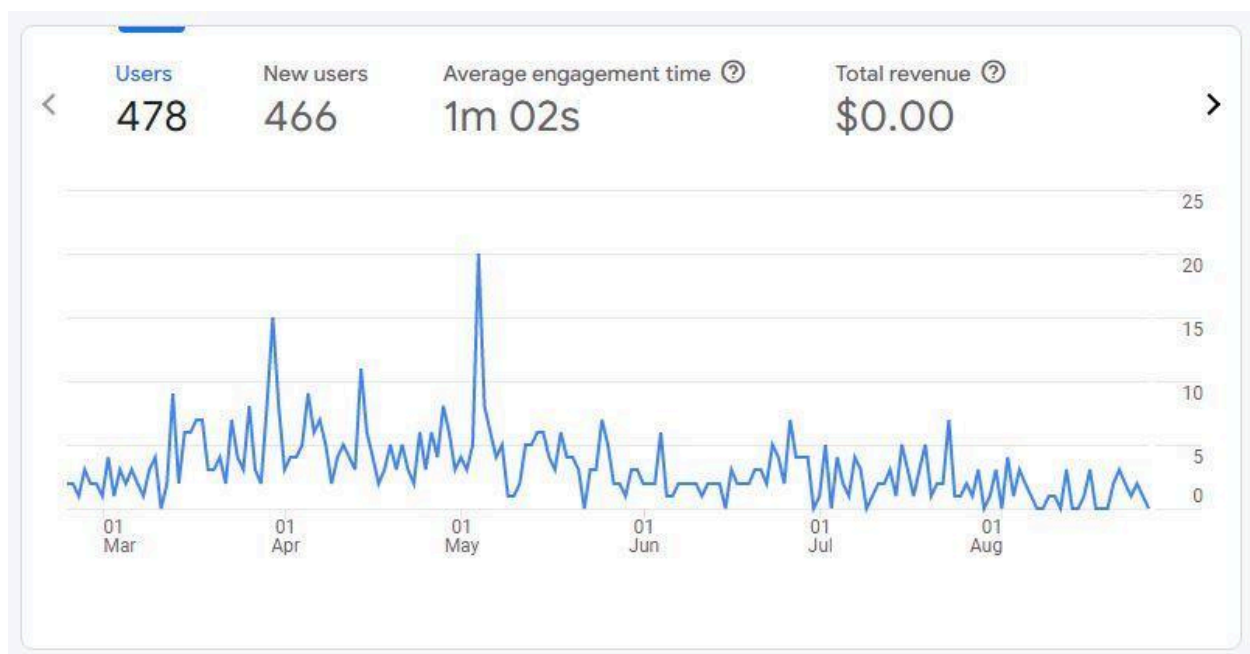

Requested USD: \$498

Short description: This proposal is submitted as part of a social contract with Polkadot Treasury to fund the ongoing maintenance costs of Guide to Polkadot-JS.

1. Context of the proposal:

[Guide to Polkadot-JS](#) has been providing step-by-step instructions for **Polkadot-JS** Extension and Apps since early July 2021.

Previous funding from the Polkadot Treasury was provided in [September 2022](#) and [December 2022](#). This supported the redesign of the original website to improve the User experience and the User interface for better findability and usability; as well as the publication of content related to the bulk of **Polkadot-JS** functionalities.

You have A LOT of options:

- xCRMK on Moonriver (this is ledger compatible): it requires MetaMask or Rabby wallet.
- RMRK on Statemine/Karura/Bifrost (this is not ledger compatible): it requires Polkadot.js or Talisman or Subwallet wallet.

Detailed info here: <https://singular.app/tokens>

There is a guide to Polkadot.js here: <https://anaelleltd.github.io/polkadotjs-guide/index.html>

Don't confuse the **Existential Deposit** (needed to keep an account active on-chain) and the **Minimum Staking bond** (needed to nominate/stake and earn rewards).

The **ED** has never changed on Polkadot: it was always 1 DOT.

The **MSB** has changed a lot over the past 2 years, but it is currently 10 DOTs. However, you need to bond about 125 DOTs to be able to get staking rewards.

Anything related to Staking is on this page: <https://polkadot.js.org/apps/?rpc=wss%3A%2F%2Fpc.polkadot.io#/staking>

Use this guide to find your way around Polkadot-JS Apps Staking: <https://anaelleltd.github.io/polkadotjs-guide/2.network.html#staking>

Alternatively, you can use these user-friendly staking dapps: <https://yieldscan.app/> and <https://www.cryptolab.network/> :)

again, insightful.

but i read, without the nominator/stash account barrier you are endangered, because the validator gets your seed?

Nachann26 · 6 mo. ago

Check this guide for more background information on networks/parachains: <https://anaelleltd.github.io/polkadotjs-guide/5.substrate.html#substrate-chains>

@sabolchick have you checked anaelleltd.github.io/polkadotjs-gui...? This comprehensive collection of step-by-step instructions for Polkadot-JS Apps and Extension was developed by Anaelle (Polkadot community member) and funded by the @Polkadot treasury as well!

Just checked it. Marvelous work. Thanks very much.

2. Breakdown:

Tasks	Procedures 	Resources 	Time 	Costs 
1. Operational costs of the search widget.	- Database setup - Custom API	Outsourced to <i>ExpertRec.</i>	Annual subscription	Second Invoice = USD \$108
2. Reference content on social channels.	-Review social channel posts -Provide links to content	x1 developer	3 hours	3 *\$65 = USD \$195
3. Monitor traffic on individual pages with Google Analytics.	-Review data on views and new users -Optimise search for most viewed content(s)	x1 developer	3 hours	3 *\$65 = USD \$195
TOTAL	-	-	-	USD \$498

A report covering the whole period will be submitted to the Council to evaluate progress made on each individual task.

3. Payment conditions:

See the table provided in **point 2**.

This is a 6-month period prepaid amount payable upon submission of the proposal.

The total DOT allocation for the milestone submission will be calculated using the [7 day EMA rate tool](#) by **Subscan** on the day of on-chain submission.
