ABSTRACT/ABSTRAK

Background: A maximum 200 words abstract in English in italics with calibri 11pt. Abstract should be clear, descriptive, and should provide a brief overview of the problem studied. Abstract topics include reasons for the selection or the importance of research topics, research methods and a summary of the results. Abstract should end with a comment about the importance of the results or conclusions brief.

Latar Belakang Abstrak Maksimal 200 kata berbahasa Indonesia dengan Calibri 11 point. Abstrak harus jelas, deskriptif dan harus memberikan gambaran singkat masalah yang diteliti. Abstrak meliputi **alasan pemilihan topik atau pentingnya topik penelitian, metode penelitian dan ringkasan hasil**. Abstrak harus diakhiri dengan komentar tentang pentingnya hasil atau kesimpulan singkat.

INTRODUCTION

The main text format consists of a flat left-right columns on A4 paper (quarto). The margin text from the right 2 cm, and 3 cm on left, top, and bottom sides. The manuscript is written in Microsoft Word, single space, Calibri 11pt and maximum 12 pages, which can be downloaded at the website:

<http://jurnal.poltekkeskupang.ac.id/index.php/jkp>.

A title of article should be the fewest possible words that accurately describe the content of the paper. Omit all waste words such as "*A study of ...*", "*Investigations of ...*", "*Implementation of ...*", "*Observations on ...*", "*Effect of....*", "*Analysis of ...*", "*Design of...*" etc. Indexing and abstracting services depend on the accuracy of the title, extracting from it keywords useful in cross-referencing and computer searching. An improperly titled paper may never reach the audience for which it was intended, so be specific (Morlan, 2005).

The Introduction should provide a clear background, a clear statement of the problem, the relevant literature on the subject, the proposed approach or solution, and the new value of research which it is innovation. It should be understandable to colleagues from a broad range of scientific disciplines (Asadei, 2007).

Organization and citation of the bibliography are made in Vancouver style in sign (Morlan, 2005, Asadei, 2007) and so on. The terms in foreign languages are written italic (italic). Authors are suggested to present their articles in the section structure: **Introduction - The Proposed Method/Algorithm (optional) -**

Research Method - Results and Discussion – Conclusion (Ward J, 2007).

Literature review that has been done author used in the chapter "Introduction" to explain the difference of the manuscript with other papers, that it is innovative, it are used in the chapter "Research Method" to describe the step of research and used in the chapter "Results and Discussion" to support the analysis of the results [2]. If the manuscript was written really have high originality, which proposed a new method or algorithm, the additional chapter after the "Introduction" chapter and before the "Research Method" chapter can be added to explain briefly the proposed method or algorithm (Calero, 2009).

RESEARCH METHOD

Explaining research chronological, including research design, research procedure (in the form of algorithms, Pseudocode or other), how to test and data acquisition. The description of the course of research should be supported references, so the explanation can be accepted scientifically.

Tables and Figures are presented center, as shown below and cited in the manuscript.

Table 1. The Performance of ...

Variable	Speed (rpm)	Power (kW)
x	10	8.6
y	15	12.4
z	20	15.3

Figure 1. Effects of selecting different switching under dynamic condition

RESULTS AND DISCUSSION

In this section, it is explained the results of research and at the same time is given the comprehensive discussion. Results can be presented in figures, graphs, tables and others that make the reader understand easily. The discussion can be made in several sub-chapters.

Sub Section 1

xxxxxxxxxxxx

Sub Section 2

Yy Yy Yy Yy

CONCLUSION

Provide a statement that what is expected, as stated in the "Introduction" chapter can ultimately result in "Results and Discussion" chapter, so there is compatibility. Moreover, it can also be added the prospect of the development of research results and application prospects of further studies into the next (based on result and discussion).

REFERENCES

The main references are international journals and proceeding. All references should be to the most pertinent and up-to-date sources. References are written in **APA (American Psychological Association)** style with **Mendeley or Zotero Tools**. Each citation should be written in the order of appearance in the text. Please use a consistent format for references – see examples below:

If references are Journal:

Author1A, Author2 B. (Year). Title of Manuscript. Name of Journal or its Abbreviation. Vol. (Issue), pages. DOI:.....
 Cho, S. H., Lee, J. Y., You, S. J., Song, K. J., & Hong, K. J. (2020). Nurse staffing, nurses prioritization, missed care, quality of nursing care, and nurse outcomes. *International Journal of Nursing Practice*, 26(1), e12803. DOI: <https://doi.org/10.1111/ijn.12803>

If references are Proceeding:

If the proceedings consists of several volumes

Author1 A, Author2 B.(Year).Title of Manuscript. Name of Conference of Seminar. City.Volume: pages. DOI:.....

Septianingrum, Y. (2020). Flipped Classroom Applying Flipped Classroom Based Family Nursing Care Learning Model to Learning Outcome in Nursing Institution. *Journal of Health Sciences*, 13(2), 144-149. DOI: <https://doi.org/10.33086/jhs.v13i02.1405>

If references are Textbooks:

If the references refer to a specific page range in a book
